PARRE

A knight and a lady once met in a grove. While each was in quest of a fugitive love A river ran mournfully marmuring by, And they wept in its waters for sympathy.

"Oh, never was knight such a sorrow that bor "Oh, never was maid so deserted before!" "From life and its woes let us instantly fly, And jump in together for company!"

They search'd for an eddy that suited the deed. But here was a bramble, and there was a weed: "How tiresome it is!" said the fair with a sigh

They gazed on each other, the maid and the knight; How fair was her form, and how goodly his height!

neight:
"One mournful embrace!" sobb'd the youth,
"ere we die!"
So kissing and crying kept company.

Sure now they were excellent company.

At length spoke the lass, twixt a smile and a tear,
"The weather is cold for a watery bier:
When summer returns we may easily die,
Till then let us sorrow in company."

By the Emerald, which will be opened early in the newesk. The remainder with their London Goodaily expected.

Speaking of wags—what is more waggish than a dog's tail when he is pleased?

By the by, speaking of tabes, we always like those that end well. Hogg's for in stance.

Speaking of hones—we saw one of these animals lying in the gutter the other day, and in the opposite one was a well dressed man (!) The first had a ring in his nose—the latter had a ring upon his finger. The man was drunk—the hog was sobert.

A hog is known by the company he keeps; thought we—so thought Mr Parker,—and off he went.

Speaking of going off puts us in mind of a gun we once owned. It need off one night and we haven't seen it since.

OLD BACHELORS LOOK HERE. - NEW INVEN-OLD BACHELORS LOOK HERE.—New INVENTION.—It is said that a Yankee down in the old hay state has invented a kind of musical clock, that he has attached to a cradle hing on pivots. The pendulum rocks the cradle, and the musical department sings the baby to sleep. This cute labour saving machine, it is thought, will induce many wary bachelors to forego their celibacy, and venture upon a series of connubindities.

Montreal, May 1.—The North-Westress.

The first or heavy brigade of Canoes will start this day from Lachine for the North West, when it is expected. His Excellency the Governor General will visit Sir George Simpson and the Company's post at Lachine. On Tresslay Sir George and the entire party will commence their long journey to the regions of the fur traders. Lords Malgrave and Caledon accompany the expedition as far as Red River Settlement, Ristant 2,000 miles, the inducement to these young noblemen being the sport of Buffalo hunting. Sir George Simpson intends to go to the mouth of the Columbia River and embark on the Pacific Ocean for California and the Sandwich Islands, returning to the Russian Posts northward of the Oregon Territory, and thence take an arctic rotte to Kanschalka, crossing Sheria to St. Petersburg, and touching by the way at some Chinese settlement. It is expected that this adventurous journey will consume two years of time in its performance from England, and cover 38,000 miles of ground.—Courier.

THE POPULATION OF BYTOWN.—We find from the Assessment Roll, the population of Bytown in 1840 amounted to 2171, and up to March, 1841, it was 3,122, exhibiting the unprecedented increase of 1049 in the space of one year.

Another Overshauling.—The British Government is the only one in the world that seems sincere in its harred to the infamous slave trade, and determined to carry out the pleiges given for its extinction. Capt Wyse, of the Leonidas, at Baltimore, from Rio de Janeiro, reports that on the 16th of March, in lat. 9 30 S. Ion. 35 47 W. he was fired into, and brought to by the British sloop-of-war Rose; the boat sent on board, and the papers demanded and examined, under the plea of supposition that she was a slaver. It proved on examination that she was not a slaver, and was therefore permitted to go; but the attempt to put an end to piracy merits approbation.—N. Y. Paper.

Componentable Prospect.—In allusion to the abundance of ice-bergs which are supposed to occasion the cold weather, an American paper says, that in 1836, when similar masses invaded our latitudes, there was frost in every month in the year but one!
