Facts and Figures Bring Out Interesting Points

In addition to the railways and branches specified in the following table there should also be included the Canadian Pacific Railway which has 520 miles of line in New Brunswick. Seven of these railways have an earning capacity in 1915, which exceeds their operating expenses, and one of them, the Temiscouata Railway, has an excess of earnings over operating expenses of \$43,450 for that year. Of others mentioned, the old Intercolonial has 486 miles out of the 1,450 shown, running in New Brunswick, and the National Transcontinental has 258 miles out of its total mileage of 1,893. The number of railways and branches, seventeen in all, covering a total mileage of 1,962 miles show how thoroughly the 27,985 square miles of the Province are served. It is in fact the province which is mostly thickly covered with a network of railways of any in the Dominion next to P. E. I., comparing with 1,367 miles over the 21,428 square miles area of Nova Scotia and 275 miles over the 2,184 square miles of Prince Edward Island. Table of railways follows:

1915
MILEAGE, CAPITAL, EARNINGS AND OPERATING EXPENSES OF NEW BRUNSWICK RAILWAYS.

LARVAECIDE

A Soil Fumigant, which is scientifically prepared, and when thoroughly mixed with the soil will destroy all insects which hibernate there

THE QUANTITY TO BE USED

For Field Crops

For ordinary field crops we advise the use of a minimum of 250 lbs. to the acre on light soil; on heavier soil, a maximum of 350 lbs. per acre may be used without risk to germination of the seed.

PRICES:

Per ton, - - - \$65.00 Per 50 lb. packages, - \$2.00
Per 100 lb. packages, 3.00 Small can or carton, .50

IN THE FLOWER GARDEN

A Plot 100x160 (about 1.6 acre) would require about 100 lbs. Larvaecide.
20x160 would require 50 lbs. Larvaecide.

Plots could be treated with one of our small cans of Larvaecide.

Heed the Warning

When your headlight reveals a "Bad Road" Sign, you do not need to be told twice to "drive slow."

When it is brought to your attention that all the "signs of the times" point to the failure of the old-style road—surely you do not need to be told twice to "drive slow" before sanctioning the construction of any more such roads.

Drive slow on the road question—find out why it is that

Permanent Highways of Concrete

are now recommended by the leading highway engineers. Search out the reasons for the failure of the old-style road.

Get acquainted with the statistics that prove Concrete to be dustless, without "waves," free from ruts, and so durable that its maintenance-cost is infinitely smaller than that of any other type of road.

Profit by the experience of communities that have discovered how to build real roads in a truly economical way. We have all this information; it's in book form and immediately interesting. Your name on a post-card will bring it to you free.
