THE WORLD AGAINST GREAT BRITAIN

LONDON, Aug. 21.—Mr. Julian Ralph in the Daily Mail this morning, quotes from a "diplomat of high standing," whose name is not given, who declares that Russia is vigorously endeavoring to secure American support and to break the harmony existing between the United States and Great Britain.

"England," says the diplomat in question, "Has no first-class power except America, which offers har the slightest ground for hoping a friendly hearing of her case. The bitter feeling of today will generate war against her tomorrow. Russia's plan, which is encouraged by Austria-Hungary, France and Germany, is to strip Great Britain of all support- -to leave her naked-before such a war begins."

You know the always-about to-happen outbreak has for years been the unending and always fresh topic of discussion and speculation in Pekin—the ghost-story with which to frighten new comers and the fertile mother of ingenious plans for defense or escape by the old-timers. Yet there was not one that was not surprised when they found the city gates actually closed and communication cut off. It was fortunate, indeed, that the marines arrived before this happened. Had they been two or three days later they could not have gotten into the city and without them and the ammunition which they brought, the legations could never have held out. On account of its extensive grounds and buildings and its adaptability for defense, the British legation was long ago selected as the place where all foreigners were to gather when the outbreak occurred.
