

Difference in Dyeing

Other firms would like to do good work; we have the plant, the knowledge, the machinery and the ability, as well as the wish.

It isn't a question of who would, but WHO CAN do your Dyeing and Finishing in the most satisfactory manner. What we do, you can rely will be well done, and our prices will be found as low as the best work can be done.

You don't want any but the best work, do you? Ship to us your off-colored Cashmeres, Serges, Henriettas, Tweeds, Yarns, Braids, Hose, Plumes, Union and Soft Silk Ribbons, and we'll transform them for very little money into choice saleable stock.

Send for Quotations.

R. PARKER & CO.

DYERS and FINISHERS,

Head Office and Works, 787 to 791 YONGE STREET

Toronto, Ont.

Subscription, \$1.00 a year.

THIS Journal is devoted to the interests of Civil, Mechanical, Electrical and Mining Engineers; Stationary, Marine and Locomotive Engineers, Sanitary Engineers and workers in the metal trades, Machinists and Iron and Brass Founders, and generally to Mill-owners, Manufacturers, Contractors and the Hardware trade.

The success of *The Canadian Engineer* has been unprecedented in the history of trade journalism in Canada, for not only was it encouraged and assisted from the start by able Canadian writers in the various branches of engineering, but it achieved what was still harder to accomplish—a sound financial position within the first year of its existence. The number of subscriptions received, and the number of firms who have sought the use of its advertising pages, have justified the publishers in thrice enlarging the paper. It is now twice its original size. While this means a large growth in advertising patronage, it also means a greater variety of reading matter and illustrations for our subscribers.
