Sports Notes — Intramural

The University Collegiate Wrestling program will begin with a meeting of all interested persons this Saturday afternoon January 19th, in the Conditioning Room of the Lady Beaverbrook Gymnasium.

Wrestling is a sport that has developed rapidly in Canada and the United States during the past ten years. At the present time wrestling is considered a major sport in most universities and colleges, however, the program has not, as yet, been developed here in the Maritimes. Several high schools in New Brunswick are conducting wrestling classes in

their physical education programs, and it is hoped that interest will develop enough to promote the sport in universities and colleges as well.

The University of New Brunswick is taking the initial step in attempting to develop wrestling on the inter-collegiate level here in the Maritimes. Classes will be conducted weekly in the fundamentals of wrestling with the possibility of working on the competitive level after the program has developed.

This Saturday afternoon January 19th, at 2:00 p.m. will see the first in a series of wrestling classes to be conducted throughout the winter months.
