We have no doubt that the Government would see the fairness of this and protect the importer for what cars he had on order at the factory a reasonable time before the duty applied. This would permit him to fill all orders and go through with the first part of the season without a disastrous loss. If the Government does not allow this there is no other course open for us but to sell off what goods we have on hand and then discontinue business, as the loss would be so great that few firms would be in a position to put on other line of goods providing they could obtain them.

Now if you can do anything in this matter we would very much appreciate it as we do not know anyone at the present time who would verify our statement except yourself. We will also discuss this matter with our local representatives here and we are sure we will have their support.

Trusting you are enjoying the best of health, I am,

Yours very truly,

*W. H. Williams*
