N. DYMENT Clappison's Corners, Ont.

A party of young men were camping, and, to avert annoying questions, they made it a rule that the one who asked a question that he could not answer himself had to do the cooking.

One evening, while sitting round the fire, one of the boys asked, "Why is it that a ground squirrel never leaves any dirt at the mouth of its burrow?"

They all guessed and missed. So he was asked to answer it himself.

"Why," he said, "because they always begin to dig at the other end of the hole?"

"But," one asked, "how does he get to the other end of the hole?"

"Well," was the reply, "that's your question."

HOW MRS. CLARKE FOUND RELIEF.

After Years of Suffering Dodd's Kidney Pills Cured Her.

Pleasant Point Matron Tells Her Suffering Sisters How to be Free From the Terrible Pains that Make Life a Burden.

Pleasant Point, Ont., Nov. 8.—(Special).—That most of the ills that the suffering women of Canada have to bear are due to disordered Kidneys, and that the natural cure for them is Dodd's Kidney Pills, is once more shown in the case of Mrs. Merrill C. Clarke, a well-known resident of this place, and a prominent member of the Salvation Army. Mrs. Clarke is always ready to give her experience for the benefit of her suffering sisters.

"My sickness commenced twenty years ago with the change of life," says Mrs. Clarke. "My health was in a bad state. Water would run from my head which would make me faint. When I came out of the fainting spells I took fits. I was bloated till I was clumsy. The pain I suffered was awful. It would go to my feet and then to my head. Many doctors attended me, and I tried many medicines, but nothing gave me relief till I used Dodd's Kidney Pills. The first box stopped the fits, and seven boxes cured me completely."

Every suffering woman should use Dodd's Kidney Pills. They make strong, healthy Kidneys, and the woman who has good Kidneys is safeguarded against those terrible pains that make miserable the lives of so many women.

QUESTIONS AND ANSWERS. Miscellaneous.

DURHAM OR SHORTHORN?

Are the long-horn Durham and the Shorthorn two distinct classes? Is there such a breed as pure-bred Grey Durhams, a breed separate from the reds?

J. G.

Ans.—The Shorthorn breed of the present was formerly called the Durham breed. They are one and the same, and, in color, may be red, white, red and white, or a mixture of red and white, called roan. There is no pure breed known as Grey Durhams. There is a distinct pure breed of cattle in England known as the Longhorn breed, but they have no resemblance to the Durham or Shorthorn. They are a large, coarse-boned breed, with very long horns, and in color are a brindled red, with a white line the entire length of the back, and generally white tail and legs.

SEEDING ALFALFA WITH RYE—CROP FOR DRAINED MUCK SOIL.

1. I wish to seed down about eight acres of sandy-loam soil next spring with rye, sowing alfalfa with the rye. It is impossible to get spring rye here, but not difficult to get the fall rye. Will I be likely to get as good results from sowing fall rye in the spring as to sow what is known as spring rye?

2. I have about eight or nine acres of low, but tile-drained black-muck soil that I want to get seeded to grass. It was summer-fallowed this year, but the summer-fallowing was not very well done. While the condition of the field has been considerably improved, there is yet considerable grass and weeds un-killed. I am thinking of putting ensilage corn on half the field and keeping it well cleaned during the summer, and of sowing peas and oats, to be cut green for feed, on the remainder, the land to be well-cultivated after the peas and oats are cut. I would expect to seed the land down next spring. What do you think of my plans, and have you anything better to suggest? I will be much obliged for your reply.

H. H. M.

Ans.—1. Our personal experience with alfalfa has been confined to sowing either with spring-sown nurse crop or without any at all. A good many who have tried sowing it with fall wheat have been disappointed. Recently, however, we have heard from several who report excellent success from seeding with a thin nurse crop of fall-sown rye, deferring the sowing of the alfalfa seed until such time in spring as the ground might be harrowed, then giving one or two strokes to loosen the surface and cover the seed.

2. Your plan is a very good one. If you have need of the peas and oats for green feed, we can scarcely suggest anything better, for this half of the field, unless it would be to cultivate well during the early part of the season, then sow rape or turnips. In this case, of course, the green feed would have to be grown elsewhere. Almost any hoed crop ought to do well under those conditions.

GOSSIP.

Gerald Powell, Lille, France, who advertises in this paper as exporter of Percheron stallions, writes: "I shipped on October 26th, from Avonmouth, on the SS. Montcalm, to Montreal, 10 Percheron stallions for W. W. Hunter, of Olds, Alberta. They are a good lot of young horses, blacks and grays, from three to five years, one dapple gray, five years, of extra-good quality, weighing a ton, and not fat. He is a grandson of the noted Besique, with strain of blood from the old Brilliant and Fenelon. Also another dark gray, four years old, sired by Etradegan. This horse, Etradegan, won championship at Chicago two years ago, and several other fairs in the U. S. A."

It becomes no man to nurse despair. But in the teeth of clenched antagonisms To follow up the worthiest till he die.
