Men who have actually been on the point of starvation, whether in the streets of a big city, in the jungles of South America, in an open boat at sea, or on the sandy deserts of Australia, give divergent accounts of their feelings.

Their stories go to prove that dif-ferent men feel starvation in differ-ent ways. Some suffer intensely; oth-ers hardly at all. Some feel acute physical pain, while the sufferings of others appear to be purely mental.

"The only craving I remember distinctly was for a glass of rum and a smoke of tobacco, and that was yery strange, because I am practically a teetotaller and do not greatly care for smoking."

A man who is now receiving a big salary in New York had a hard time when he first came to this city, and nearly starved. For days and weeks together he did not have a decent meal, and, by his own account, he suffered tortures.

"I could not keep still," he said.

"I could not keep still," he said.
Often, when I was frightfully hungry and hadn't a cent to buy anything, I would go to one of the free libraries and try to force myself to sit down and rest.

gave up all his prospects in life some years ago to become a social worker among the poor of the east end of London. In order to get an idea of what it felt like to be really poor he lived for six days on 12 cents, eating nothing more than one tiny two-cent loaf each day. As a result, he nearly starved, and was ill for a week afterward.

"It would not have been very trying, he said, "if it had not seen food all round me—in the bakers' shops, in the restaurants, in the butchers' and in the green-grocers'. I would walk about the streets for hours, watching the people go into the restaurants for lunch and wondering what they were going to eat. gave up all his prospects in life som

By the end of the third day I was in a half comatose state. Practically. I had lost my identity and "I was always thinking about food,

but in quite a detached sort of way, as if it were nothing to do with me. I thought of it as an untravelled man might think of India. "My reason told me that in three days I could eat as much as I liked, but my mind could not take hold of that fact. It seemed as if I should always be eating one tiny loaf a day and watching other people go into restaurants.

"On the fifth day I was utterly cowed. If a man spoke to me I trembled and could not answer, but slunk away. Every bit of moral fibre and every ounce of physical pluck was gone."

After this experience, the graduate in the school of starvation took keen interest in discovering the sensations of other men who had gone hungry. He met many of them

"The more animal a man is, the more comfortably he can starve. Some laborers who nearly died of exposure and lack of food have told me that they hardly suffered at all. They soon drifted into a semi-conscious state, which dulled their physical pain, and they had not sufficient intelligence to substitute the many of the imagination. the pages of the imagination. A direct negative to this theory is given by a professor of an Australian university, who narrowly escaped dying of starvation during an expedition into the desert country of Central Australia.

"I could have borne the real horrors of the days a thousand times better," he said, "if it had not been for the tantalizing miseries of the nights."

This same explorer, during the month of semi-starvation which he experienced, suffered constantly from violent headaches, dull gnawing pains in the stomach, and bad attacks of malarial fever. And all the time he could think of nothing but food, which increased his misery tenfold.

I' did not find that hunger in any way affected my mental powers. On the contrary, it seemed to improve them. I was able to take the keenest interest in my scientific work.

"Possibly the fact that I had something to occupy my mind saved me from suffering as the others did. They, poor wretches, had nothing to do but to think of food. I believe that was why they suffered so keenly."

WALK AND RETAIN HEALTH

Judicious Pedestrianism is the Best Exercise for All Classes.

Walking is the simplest, and most natural and the most wholesome of all exercises. No athlete ever trains for a contest, no matter what its for a contest, no matter what its nature may be, without walking a considerable distance in the open air each day. Many keep in vigorous health by this alone, and no matter what other exercise you take you must walk. But, first of all, learn how to walk. A great many people walk in an aimless, shuffling manner and secure but little benefit from the exercise. In walking for exercise the effect is better if the kind is directed toward some pleasurable directed toward some pleasurable end. Walk with conscicus, y directed movement until you have brought every muscle under perfect control of your will. Moping along in an aimless, lackadaisical manner does little good physically and harms are

Mexican Peasants Have a Chron Aversion to Work of Any Sort.

Aversion to Work of Any Sort.

The peon, or peasant, of Mexico is probably the laziest mortal under the sun. He seidom leaves his home and only under the most extraordinary circumstances can be be induced to perform any labor. It is very difficult to induce one to go to a part of the republic where labor is scarce and wages doube that of his own district. Large contractors have therefore resorted to an expedient to secure labor. They often go and engage a whole village of peasantry, from the interior and move them all, men, women and children, to the scene of their labors. The welathy ranchman has often to resort to this expedient to secure laborers to work his land or attend to his cattle. For this same reason every ranch of large dimensions in Mexico has several small villages inpon it which consist wholly of people and their families employed upon the ranch.

ranch.

As the Mexican peasant is careless about money matters, so he is careless about everything he does. Very rarely has he any interest in his work, and so it is usually very baddy done. He cannot understand why anyone should want to hurry or to do more than he actually has to do. If you leave him alone and expect him to work in your absence there are ninety-nine chances out of 100 that you will be mistaken. In all probability he will sit down and patiently walt for your return, and smoke the inevitable cigar to pass away the time.

smoke the inevitable cigar to pass away the time.

As the peasant is with his work, so he is with his family and his home. In most cases, though he loves them in his own way, he takes no thought of them. The wife has therefore to exert herself to make both ends meet and she generally does.
