TORONTO WHOLESALE MARKETS

WEEKLY REVIEW. THURSDAY, Oct. 14. PRODUCE. The market has manifested increased activity since our last; receipts of some sorts of grain have been augmenting, and the demand for them has been well maintained. Prices have been rather unsettled; they remained low during the latter part of last week, but took a jump on Monday, part of which has since been lost. Receipts both by team and by rail have consisted almost entirely of barley; it has been all wanted, but the desire is frequently expressed that some wheat could be had also. There can be no doubt that the barley crop has been a prosperity amongst us both in town and country. eks here have increased considerably, and stood on Monday morning as follows :- Flour, 1,440 barrels; fall wheat, 16,956 bush.; spring wheat, 19,698 bush.; oats, 2,800 bush.; barley, 351,-388 bush.; peas, 14,875 bush.; and rye, 7,674 bush., against on the corresponding date last yearflour, 4,200 barrels; fall wheat, 110,560 bush.; spring wheat, 93,346 bush.; oats, 900 bush.; bar-Iey, 181,682 bush.; peas, 8,065 bush.; and rye, 9,597 bush. English advices show an advance of 9d. on flour; of 3d. on spring; of 5d. on red winter; of 2d. on white and club wheat and corn, and a fall of 2d. on peas. Markets during the last two days have been quiet and rather easy; but were ed on Monday, when prices ran up over a shilling per quarter. The cause of the excite nt seems to have lain partly in the unfavourable weather of last week, partly in small arrivals, and partly in a continental demand. The tendency was upwards nearly all through last week, and the situation is said to be favourable for an advance in British grain. The supply did not show much increase during last week. Sales of home-grown wheat last week were 200,440 quarters, and imports were 210,000 to 215,000 quarters of wheat, and 120,000 to 125,000 barrels of flour, making a total supply equal to 477,940 to 485,752 quarters of wheat, against a weekly consumption of 454,000 quarters. The quantity of flour and wheat in transit on 7th inst. showed little change, and was 1,300,000 quarters, against 1,246,000 on the 24th ult., and 1,626,000 on the corresponding date of last year. The total quantity of wheat in sight on this continent and in transit for Europe on the 24th ult, was 31.381.-000 bushels, against 42,246,000 last year, and 35,584,- Extra. 000 three weeks ago. Mail advices say that crop reports were not bearing out the previous very favourable anticipations, and some parties were questioning whether the yield was up to an average. The damage done by recent storms is said to have proved greater than was anticipated. and it was certain that the quality was not giving satisfaction, as is proved by the fact that the average price of English wheat for the first month of the season was only 41s. 9d. per quarter, against 47s. 7d. last year. Small supplies were expected in the present and succeeding month, in consequence of the decreased quantity in sight and in transit. It was thought that be- Rye. tween now and Christmas sellers might have a slight advantage, and the subsequent course of prices seem to justify this view. Continental advices state that in France, as well as elsewhere, crops are not turning out as well as had been expected, and that American wheat would be needed for mixing as well as to supply the deficit. Low prices and field-work were keeping ners from the markets. The summary of reports from wheat market shows 36 dearer, 14 arm, 18 unchanged, 1 quiet, and 10 lower during the week ending on the 25th ult, In the ports the week ending on the 25th ult. In the ports
the arrivals had rather slackened, the total in
the six principal ports being 135,000 qrs., against
159,000 qrs. in the previous work.
Eggs, fresh, per doz 159,000 qrs. in the previous week. Foreign wheat was firmer in the ports, and at Havre and Rouen values are higher, red winter being held at 44s. d. per 480 lbs. free on rail. Marseilles was quiet teady, with stocks slightly on the increase. Heavy consignments are said to be in transit.

German markets were firmer. At Berlin wheat had improved considerably and in rrethe transactions are said to have been "enormous" at beoming prices. At Hamburg wheat was in good demand at rising prices, but only millers buying, there being no export trade. Arrivals

As well as can be judged at present the chances of reaching even the export of 1864 during the present year are decidedly bad. In the States markets have been advancing in sympathy with European advices. At New York something of excitement has prevailed, n consequence of the deaire of shippers to cover their London sales. The movement reached its highest point on Monday, after which there was a slight reaction. In the west small deliveres have tended to keep up prices, but the high figures already reached, which are relatively higher than those of either seaboard ports or

supply of grain, comprising the stocks in granary at the principal points of accumulation at lake and eaboard ports, and the rail shipments from vestern lake and river ports:— 1880, 1880, 1879, 1878, Oct. 5, bush. bush. bush. bush. bush. 51,143,807,769 14,994,632 18,144,639 13,549,678 19,812,209 19,190,808 10,988,531 11,035,674 2,746,558 2,105,270 2,541,863 3,942,782 1,405,506 816,486 1,705,277 8,776,721 664,346 691,837 687,008 1,244,183 Total ..38,987,688 37,799,033 34,019,323 33,849,038 The following table shows the top prices of the different kinds of produce in the Liverpool mar-

Crop reports from eastern and southern provinces, it is said, prove to have been but too well founded, all cereal having suffered more or less from rain during harvest, and there is much damaged and sprouted grain. Particularly the quantity of barley available for malting purposes, turns out smaller than anticipated. Russian advices state that at Odessa on the 13th uit. the principal business was still that on barley. Wheat, however, was wanted and improving. Baltic advices say that shipments from Cronstadt were mil, and that there was little demand heard for forward tonnage. Russia's surplus for export seems involved in doubt, but at beat it must be very small, From 1873 to 1879, both inclusive, the average export of wheat from Russia was 61,597,335 bushels. Her average wheat export from 1864 to 1873 inclusive, was 45,910,856 bushels. Her average wheat export from 1864 to 1873 inclusive, was 45,910,856 bushels. BUTTER—Offerings have continued to be small, and all wanted at steady but unchanged prices. Selections have sold at 19 to 20c., and the same prices were freely bid to-day. Still some good round lots, with white out, have sold occasionally at 17 to 18c. Receipts of small lots of choice for the local market have been on the increase and rather easy at 20 to 21c. TRADE—Has generally been rather quiet.
Beeves—Receipts during the week have been of fair amount, but generally of poor quality.
Nearly all, however, have found a sale at fairly good prices, and had there been some more of ine quality offered they would readily have been taken. First-class for export, that is steers weighing at least 1,200 lbs., have been very quiet, as there have been very few offered, and the demand has been somewhat slack; still they may be quoted as worth \$4.50 to \$4.75. Second-class, consisting of light steers and heifers, and heavy cows, have been in steady demand for the local market, with none too many offering, and prices steady at \$4.00 to \$4.25.
