GIVE US THIS KIND OF A BOY

Every now and then we parents of ordinary children are apt to feel discouraged by reading of the phenomenal development of some one else's child. A few years ago there was a child prodigy who knew six languages when he was six years old, passed college entrance examinations when he was eight and entered Harvard when he was eleven. He was the son of a noted scholar.

Theoretically, he ought to have been a world wonder. His mind evidently was so constituted that he could grasp and retain most complex and difficult texts. As a lad in short trousers he lectured the Harvard professors on the fourth dimension which is just about as simple as Einstein's theory.

But instead of setting the world on fire this mental marvel is earning \$23 per week as a statistical clerk in a New York office. And according to the newspapers he doesn't seem to care much whether school keeps or not. He doesn't show much ambition.

It would have been better if he had shown, some years ago this disregard for the continuity of school sessions. The boy, from one point of view had every opportunity thrown his way. Instruction was his on all sides on any subject. But in another sense of the word, he didn't get a square deal.

The good Lord never intended that little boys should be showing their noses into books all the time or that instructors should take the place of play fellows. The Lord

did intend that they should be out in the open playing, getting dirty and tired, and it is quite easy to believe, when they played hockey and forgot to turn up at school some fine morning when the skating was extra good, that the Lord entered this lapse from virtue, in vanishing ink.

Of course, the little book worm didn't have time to get dirty and tired. When he should have been out rooting in the garden, he was digging out Greek roots, and when he should have been down at the old swimming-hole he probably was all muddled up in mathematics or hydraulics. Mighty poor substitutes.

Give us the boyish boy, the little dirty faced human animal, who gets to school in good spirit most of the time and who plays his fool head off when it's time to play, who has an appetite that makes his father and mother look on in wonder mixed with envy, and who gets his English woefully and wonderfully mixed up at times.

That's the kind of boy who is going to develop into the man who takes his place along side his fellows and who will pull his weight in the boat. Not a world beater, but a good, competent kind of a citizen who had a boyhood and looks back to it with kind remembrances. It's this kind of a boy who will put his education to the best use in the days to come and he will have a real human background, which this poor prodigy seems to lack most woefully.

WELL PLEASED WITH SPORT IN PROVINCE

E. F. Wolfe, vice-president and editor of Sportlife, published in Philadelphia, is having a good time in camp just 26 miles beyond Newcastle, and he has written the following appreciative letter to C. B. Allan secretary of the New Brunswick Tourist Resources Association who was active in arranging for Mr. Wolfe's camping trip:

We are living the life of Riley on the Miramichi. Water is much too low for salmon fishing but we managed to catch a 10 pound salmon the first day here, and two others since.

This is a wonderfully appointed camp, splendidly located, and we are having a fine time and getting a lot of good photographs. Seeing lots of game. In a bog just below camp we can see moose and deer any evening and have photographed some of them. One moose called on us in camp at dinner, the first evening we were here.

Tomorrow we are going on a two or three day trip to a hunting camp owned by Mr. Matchett, the caretaker of this camp and warden here.

Am getting a wealth of material for good stories here, as Matchett knows the whole province and all about it. Colonel Loggie of Fredericton paid us a visit and stayed here with a party of friends for three days. The Colonel told me that if I gave them good publicity he would get me free license up here! There is no question about the publicity as I am getting the material.

Will write in more detail when I get back home.

Will stop over for a day in Fredericton to get some information and data about the province there.

With best personal regards, I am

Very truly yours,

(Sgd.) E. F. WOLFE

Mr. Wolfe was gathering material and illustrations for stories and articles on outdoor life in New Brunswick and he appears to have been favorably impressed with the province's attractions.

The camp which served as his headquarters was one of about 30 or 40 located in various parts of the province, which possess every convenience for the sportsmen and afford excellent opportunities for hunting and fishing.

There were in New Brunswick at present, Mr. Allan said, about 600 guides and this year there had been one or two new camps opened as well as some new hotels on the North Shore which would promise an exceptionally good year for the guides with a large number of sportsmen going into the woods.

The hunting season for moose is from Oct. 1 to Nov. 30 and for deer from Sept. 15 to Nov. 14 while geese and ducks etc. may be shot from Sept. 15 to Dec. 31.

The New Brunswick guides are a fine lot, kind and courteous to the stranger, and well posted in their business. Many of them have first rate camp outfits, such as camps, boats and supplies and can take care of parties, including ladies, with every satisfaction.

The improved roads of the province make it possible to motor to all parts in comfort and many of the sport camps are reached by automobile.

ANTI-UNIONISTS ISSUE CIRCULAR

Presbyterian Association Review Progress of Church Union

The Federal Executive of the Presbyterian Association has issued the following statement setting forth its attitude and indicating the action it will take following the passing of the Act incorporating the United Church of Canada.

It points out that amendments made in the Bill were to its advantage. This is the first official statement since the passing of the Bill and will be distributed in printed form in the Presbyterian churches throughout the country. The statement says:

The Act now provides that within six months before it comes into force (June 10, 1925) any congregation may, by a majority vote, decide whether or not it will enter the United Church of Canada. If by such vote it determines to remain a congregation of the Presbyterian Church, it retains its congregational property; this, it will be seen is a decided gain. We also secured, after much effort another favorable amendment to the Bill in the method of taking the congregational vote. Provision has been made for voting by ballot which will make it possible for all who are entitled to vote to have a voice in the disposition of their congregational property.

The date set for the commencement of congregational voting is December 10th next, and provisions for taking this vote are as follows:

A meeting of the congregation for the purpose aforesaid may be called by the authority of the Session of its own motion or, if any session should be unwilling to call such meeting then a meeting must be called by the session on requisition to said session in writing of ten members entitled to vote in a congregation of 100 members or less, or 25 such members in congregations having over 100 and not more than 500 members, and 50 members in congregations of over 500 and not more than 1000 members, and 100 such members in congregations of over 1000 members.

We would counsel congregations to take such vote as soon after December 10 as possible and also warn them that if any congregations remain inactive and fail to take a vote in the appointed time—December 10, 1924 to June 10, 1925—such congregation automatically becomes a congregation of the United Church and further we would urge all Presbyterians to remain members of the congregation with which they are now connected until the congregational vote shall have been taken.

PAYS \$54 A DAY FOR HIKE OF PULLMAN CAR AND CREW.

Robert T. Crane of Ipswich, has paid \$54 a day for the last year to the Pullman Company for the hire of a Pullman car. He still has the car and when he is not travelling in it, he keeps it ready for the next trip. The \$54 which is the regular rent for a Pullman whether in use or not, includes the pay of the crew which consists of waiter, cook and porter. It does not purchase food. This figure is additional to paying the fares for every seat in the car whether used or not. An ordinary car has 25 seats.

ANOTHER PROPHECY

One of the early weather prophets predicts that, on account of the proximity of Mars to the earth, exceptionally mild and fine weather is likely to last up to nearly Christmas time. Not being in the coal business, we trust he is correct. Possibly, pending the damming of the Straights of Belle Isle, it would be a good idea to put a permanent hitch on Mars.

UNION OF N. B. MUNICIPALITIES MEETS AUG. 21-22

As previously announced the ninth annual convention of the Union of New Brunswick Municipalities will be held in the City Hall, Moncton, on August 21st and 22nd, Thursday and Friday. The opening session will be at 2:30 p.m.

The program for the two days' convention will be as follows:

The School Law of New Brunswick Re-stated—George J. Trueman, M.A., Ph.D., President of Mount Allison University

Housing Problem—Mayor N.C. McKay, Mayor of Campbellton.

New Brunswick Hydro Problem in Relation to Grand Falls—Samuel D. Weston, B.Sc., A.M.E.I.C. Engineer New Brunswick Electric Power Commission

Tuberculosis in Children—The Deadly Contact—Hugh A. Farris, M.D., Superintendent St. John County Hospital.

Provincial Valuation—J.Y. Mercier, Ex-Mayor of Chatham.

The Administration of Criminal Law in Relation to Insanity as an Excuse for Crime—J. King Kelley, K.C., B.C.L.

OPEN DISCUSSION

1. Resolved that the Government of New Brunswick be requested by the Union of New Brunswick Municipalities to enact legislation providing for a just valuation of the real and personal property of all ratepayers within the Province of New Brunswick free from local and partizan control

2. That school districts be abolished and the collection of rates and the payment of public school teachers be made by the City and Town Treasurers and the County Secretaries and the appointment of public school teachers be vested in a non-political board of education, for the entire Province.

3. The establishment of a Board of Arbitration to whom might be referred all ultra municipal disputes.

Advanced Safety Devices

Stimulated by the rapid motorizing of Swedish highway traffic, native engineers have patented three inventions for the comfort and safety of motorists in that country. These are an automatic beacon light for giving warning at railroad crossings; an automatic slot machine for refilling gas tanks, and a device which prevents the accidental running out of batteries.

The crossing beacon consists of a flashing light in a cylindrical lan-

MAGIC BAKING POWDER

It contains no alum and leaves no bitter taste

tern with red and white sections in opposite quadrants. When the railroad is clear the white lights no indicate to the highway traffic, but when a train approaches the lantern rotates automatically showing a red light to the highway and a white light to the train. This beacon will work under unfavorable conditions of snow and ice.

The automatic gasoline vendor can be utilized by the customer at any time of night and day by connecting the tube with the gas tank of the car, dropping it in the slot, and operating a lever. The quantity of gasoline received naturally varies according to the market price, which can be quoted at the minimum, owing to the saving of wages for attendants.

The attachment which automatically cuts off the batteries when the engine is stopped involves the principles of suction and gravity. It is essentially a switch system which is connected with the gas intake or the lubrication pipes so that the suction actuates a weight that rises and closes the electric circuit. When the suction stops, the weight falls and throws the switch open.

SUNBURN SPRAINS ACHING FEET

JARS 20c. & 50c.—TUBES 30c.—At all Drug Stores

WHEN USING **WILSON'S FLY PADS** READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACTLY

There is only one way to kill all the Flies

This is it—Darken the room as much as possible, close the windows, raise one of the blinds where the sun shines in, about eight inches, place as many Wilson's Fly Pads as possible on plates (properly wetted with water but not flooded) on the window ledge where the light is strong, leave the room closed for two or three hours, then sweep up the flies and burn them. See illustration below.

Put the plates away out of the reach of children until required in another room.

The right way to use Wilson's Fly Pads

STOP that cough before it begins—take **SCOTT'S EMULSION** right now to nourish the system and to build up strength and resistance.
