314 WATER STREET

Municipal Council

WEEKLY MEETING.

The weekly meeting of the Council was held yesterday afternoon. Mayor Cook presided, and Councillors Martin, Outerbridge, Collier, Ryan and Dowden were present.

The meeting was a very short one; the following business being transacted.

F. W. Marshall, of Marshall's Garage, Ltd., who for several years past has been carrying on a Bus Transportation Service between Water St. and the Higher Levels, the starting point being Queen's Street, called attention to the fact that some days ago he was notified to discontinue parking at the latter place. He stated that since the beginning of the service, they had made this street their stand and could see no reason why they should now be compelled to go to George Street. The Council, however, has issued no instructions to this effect, and it was decided that a copy of his communication be forwarded the Inspector General.

The application of the residents of Warberry Street, for water and sewerage extension, was referred to the City Engineer, who is to submit estimate of the cost of this work.

Mr. A. W. Miller, Superintendent of the Poor Asylum, called attention to the need of having a light placed at the foot of Sudbury Street. This was referred to the Lighting Committee.

Regarding the petition of the residents of Theatre Hill and Dick's Square, for closing of the lane rear of the Star Hall, it was ordered that their request be granted, and that gates be placed at both entrances to this place, namely Bogus Street and Dick's Square.

Messrs. Baine, Johnston and Company, Agents for Newman's Estate, informed the Board that arrangements would be made for the removal of the dilapidated building, Duckworth St., as requested.

The Medical Officer of Health informed the Council that the usual spring inspection of back-yards was now in progress.

PLANS.

The following plans were passed, subject to the approval of the City Engineer.

Dwellings—Wm. Dwyer, Forest Road; Thos. Walsh, Water Street West; Iron Shed, Imperial Oil Ltd., Southside; Extensions, George Rowe, Mundy Pond Road, Mr. Murphy, Brazil's Square; West End Candy Store, Water Street; Garage, M. Fahy, Boncloddy Street.

The plan submitted by the Reid Newfoundland Company, for extension to garage, Victoria Street, was deferred, until the report of the City Engineer is received in relation thereto.

During the past week a burst occurred in the main at the Western Higher Level Service, at Coughlin's Bog. The Waterworks Department were immediately put to work, and had repairs made.

CLEAN-UP DAY.

It was finally decided that May 21st be set apart as "Clean-up Day." Citizens are requested to have the garbage and accumulations placed in proper receptacles in front of their dwellings, so the same may be removed by the Sanitary Department.

Any citizens wishing to co-operate with the Council in its endeavours to make the City clean and wholesome, and who are desirous of giving assistance of any kind, such as the use of horses, carts, motor trucks, etc., are requested to communicate with the City Clerk, or with Sanitary Supervisor Dwyer, or send same to the Sanitary Stables, Hayward Avenue, at 7 a.m. on the date mentioned.

The Medical Officer of Health reported seven new cases of Scarlet Fever and one Diphtheria in the City during the past week.

The reports of the City Engineer, Sanitary Supervisor, etc., were tabled.

Orders were given for the placing of a new fence along the Circular Road side of Bannerman Park; also to have preparations made for putting the play ground apparatus in position.

The meeting then adjourned.

Antwerp Cutters

MAKE DIAMONDS MORE BRILLIANT.

Diamonds will gleam with four-fold brilliance, yet cost considerably less, if the invention of two Antwerp gem cutters is perfected. Working in a gloomy, poorly equipped shop, these two men, whose names have not been revealed, suddenly decided that progress in their art had not kept pace with other industrial science.

After six months' research, often working till nearly daybreak, they found a method of cutting and polishing diamonds which gave 695 reflections, instead of the usual 175, besides yielding a fire that had not been obtained since the days of ancient Egypt. Moreover, under this process, the rough stone loses almost nothing in its cutting and the smallest chips may be made to glow as brightly as any princely gift of several carats.

Some American diamond buyers have been negotiating for American rights to the invention, but the Belgians refuse to sell until they have revolutionized the industry.

Surprising New Star in Mystery Romance

In a setting of romance and mystery woven into a story of the art studios of New York City, under the title of "The Proof of Innocence," Louise Du Pre the famous understudy and double of Mary Pickford will be formally presented by the Nickel Theatre beginning to-night.

This widely heralded but still mysterious screen celebrity will, then, to speak, step out from under cover and satisfy the fans, she is reported to be an artiste of rare ability and the vehicle selected for her debut is one that allows a display of her remarkable artistry in portraying a "child" part and later a "group-up" role.

The producers, realizing that the public would want to see her in both of these characterizations had "The Proof of Innocence" especially written for her and advance information states that it has every angle of a successful screen drama.

A new program of songs and duets will be rendered by Jackson and Miller, the popular vocalists.

Don't suffer—Sloan's gives instant relief and drives away the pain. Keep it handy for RHEUMATISM, SPRAINS, BRUISES, NEURALGIA AND ALL NERVE PAINS. Of Chemists Dr. and Co.

SIDE TALKS.

By Ruth Cameron.

ON BEING IN THE KNOW.

Really, when you stop to think of it, isn't it positively extraordinary the way we love to be in style about both little and big things.

(For that matter there are few things that aren't rather queer when you stop and detach your mind from its mooring and look at them from a new angle. Like a familiar landscape made strange by stooping over and looking at it between your own legs.)

You HAVE To Do It. The thing that got me to pondering on style was this. A friend of mine who never cared for games of any sort is laboriously learning mah jong.

"I don't really care for it," she explained, "but if you don't play you are left out. Everybody does it. You really have to do it."

She seemed to think that settled it. But why should it settle it? Why does she have to do it if she doesn't like it? Why not be willing to be left out of that particular diversion if she doesn't enjoy it. Is it possible that one can be happier doing a thing one doesn't enjoy with the crowd, than doing a thing one does enjoy with the few who also enjoy it?

Again, a neighbour of mine gave me a very doleful good morning the other day when I met her. The reason for

the dolefulness presently she had bought a new coat before. She had hesitated which fastened by a side and another which had a value. "And now," she had found out why it was fastened that way so much was afraid I was making when I bought it."

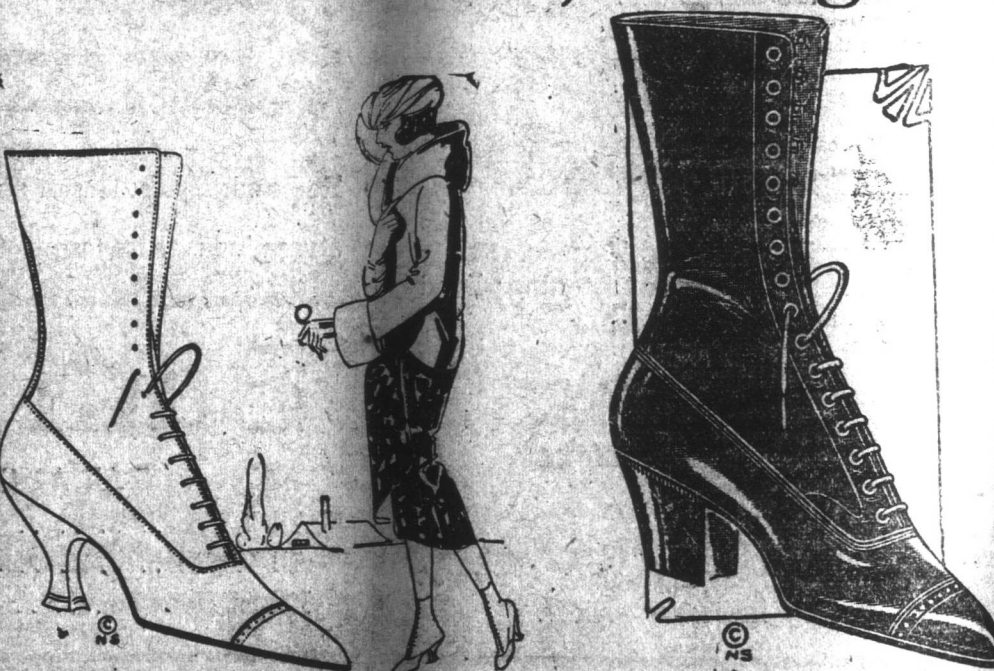

One would have thought that something really happened.

People love to be in the all sorts of little details.

Important matters. How proudly mine announces when someone and leaves the dealer to wonder how they do it. They aren't going to waste their overshoes all under more but just fasten the top.

Some people have pondered for always knowing those about what they are doing. I already read, cutting means of agrees. He thought what his he, it was a case should be praised and let seat free for causing treachery punished.
