The Niagara Falis Railway. In order to understand clearly the object tionableness of the bill now before the Ontario legislature to charter a railway from the Falls dewn the river on the Canadian side it is necessary to remember where the road will run. The object is to lay the rails at the foot of the hill on the Canadian aide of the river, close to the water's edge down to Queenston. To many such a pro ject may seem absurd, but there are really no formidable engineering obstacles, as those who have traveled on foot along this part of the stream well know. It is said that the whole distance from Queenston up the river has been done on foot, and wherever this is the case a railway can be

In the first place, to place a railway along the foot of the hill will drive all pedestrians away from the spot, for there is not room for both. No foresight or precaution could prevent numerous accidents in so confined a space, and it would be an arbitrary act to give the railway company sympathy with Dr. Burwash. power to prevent people from walking can be shown that the presence of trains hold along the bank of such a terrific torrent is compatible with the safety of all parties the objection will be partly obviated; but this has not been done, and we trust that the matter will be thoroughly ventilated when it comes up in the house. It will do no harm to hold it over for a few years' consideration, and send the bill to keep company with the one incorporating the

Park company.

Scarcely less objectionable is the vandalism of the preject. What is it that justi. Ses the present effort to make the ground about Niagara Falls a public domain but about Niagara Falls a public domain but the extraordinary nature of the spectacle and the desirability of making it free to all? To charter a railway company to carry passengers from the Falls down the gorge of the river is to inflict a blot on the scene without even the excuse of necessity. The railway and excuse of necessity. The railway and passenger bridges cannot be dispensed with, but in the name of common sense, if a rail-way must be built along the river, keep it

and Russia at this time, but it is merely a postponement. To a dead certainty the war is coming, and that within a very few years. It is not claiming any gift of prophecy to assert this. That the Afghans should side with the Russians would be almost incred. ible, but, unless they do, the latter must be doomed to defeat in the terrible mountain passes. The Afghans may prove traitors at the last moment, and "go back" on England, but if they did it would be the worst thing they ever did for themselves, There are Russians who know this, but ower which they cannot control drives hem on. At the meetings held in Cobourg to protest against the proposed change Professors Burwash and Reynar made speeches. The atter said he saw great force in many of the objections raised to the scheme, but he was of opinion that we could not maintain three universities efficiently on Lake Ontario. Dr. Burwash said:

They found it was impossible to sustain three efficiently equipped universities in Ontario. As c mpared with the universities of the United States, the best we could show was only a one-horse system. The bone and sinew of our young country, intellectually, was being drawn away from us. He was not ashamed to acknowledge the paternity of this scheme, which he contended would (1, give us a compact college organization: (2,) give church and state their appropriate field of work: (3,) promoté h broad, christian, liberal spirit; (4,) combine the resources of private liberality, with all that the state can do for high class education; (5,) furnish Ontario with an institution equal to anything on the continent.

therein, and at other times by the same persons, we have been led to make a little pretence has ever been made that England was invading Russian territory. The invasion has been all the other way. Russia is the attacking party, but it is quite possible that she may have been calculating beyond her streagth.

It is not very likely that any entente

In land, but from Russia they could expect nothing better than to be crushed. In India their religion has been respected, but were Russia in control they might expect no mercy.

What is really the motive power that drives Russian armies into central and even towards southern Asia? Most probably this—the need of giving such an outreputed to be men of the highest standing. It will not be effected by legislative machinery—that, at the best, can only clear the way for men to help themselves. The postrums of the day—comonly clear the way for men to help themselves. The nostrums of the day—community of goods, the abolition of property rights in whole or in part, the cry of "no rent," the destruction of land titles, the nationalizing of the soil—never will bring in the millennisl age.

Catarrh-A New Treatment. Perhaps the most extraordinary success has been achieved in modern science has b Perhaps the most extraordinary success that has been achieved in modern science has been attained by the Dixon treatment for catarrh. Out of 2000 patients treated during the past six months, fully ninety per cent, have been cured of this stubbora malady. This is none the less stardling when it is remembered that not five per cent, of the patients presenting themselves to the regular practitioner are benefitted, while the patent medicines and other advertised cures never record a cure at all. Starting with the claim now generally believed by the most scientific men that the disease is due to the presence of living parasites in the tissues, Mr. Dixon at once adapted his cure to their extermination; this accomplished, the catarrh is practically cured, and the permanency is unquestioned, as cures effected by him four years age are cures still. No one else has ever attempted to cure catarrh in this manner, and no other treatment has ever cured catarrh. The application of the remedy is simple and can be done at home, and the presentseason of the year is the most favorable for a speedy and permanent cure, the majority of cases being cured at one treatment. Sufferers should correspond with Messrs. A. H. DIXON & SON, 305 King street west, Toronto, Canada, and enclose stamp for their treatise on catarrh.—Montreal Star, 26

Lut in the name of common sense, if a railway must be built along the river, keep it upon the hill where it will not interfere with the great asshetic object for which spend a large num of public money.

The passage of the railway bill would, in the opinion of those who know the stuation, be probably fatal to the park scheme in the New York Legislature. Nor could we blame our neighbors are neighbors are neighbors are should this turn out to be the case. If there is to be a park at all it must be international. That there will be one some day is certain. Why add to the complication of creating another vested interests, especially one for which the owners make no return to the public? The railway will be cheaply constructed. It will have a large traffic. It will pay the promoters handsomely. If they must have the charter, compel them to pay something for it and towards the redemption of the pand about the falls so as to make the latter perfectly free to the general public.

War Fostpeaced.

Wheat active and lower considerably; long wheat was thrown on the market and was more short selling, due to the pacific tone of foreign despatches and weaker continental grain markets; friendliness that they have to a certain extent imposed on the general public. But in inner circles, in the war office, and the foreign office, no such delusion has really obtained. The authorities have known all the time what was coming, though it has not been deemed best to publish it in the daily papers.
