Scal Remance is Stamble Life.

From The St. Louis Globe Democrat.

An instance almost as strange as fiction itself occarred in the marriage license department at the Recorder's office yesterday. It appears that about fifteen years previous to the late Civil War a colored man, who now gives the name of Anthony Edwards, and who was then married after the custom of those times, resided with his master in Pike County, Mo. From some cause not known to Edwards his master sold him to a Southern planter, but retained possession of his wife and one child, the only result of the marriage. After reaching the South, Edwards lost all trace of his wife and his former master and child. After the war he remarried, as did also his wife. His second wife dving, he drifted to St. Louis several years ago, and by a peculiar coincidence his wife, having lost her second husband, also came to this city, the daughted by the Pike County or slave fiarriage accompanying her. The daughter, having received some intimation that her father was in St. Louis, made indefatigable efforts to find him and after about three years' search succeeded in locating him in Edwards-ville. The result was a meeting between her father was in St. Louis made indefatigable wille. The result was a meeting between her father and mother, after separation of over thirty-five years. The sequel of this meeting was the appearance at the Recorder's office yesterday of the aged couple for the purpose of obtaining a marriage license. They gave their names as Anthony Edwards, age seventyning years, and Lucinda Gibson, age seventyning years, and Lucinda Gibson, age seventyning years, and Lucinda Gibson, age seventyning years of life. The daughter was present, and appeared overjoyed at the result of her endeavora.

Mr. H. McCaw, Custom House, Toronto, writes: "My wife was troubled with dyspensis

H. McCaw, Custom House, Toronto, s: "My wife was troubled with dyspepsia heumatism for a long time; she tried different medicines, but did not get any until she used Northrop & Lyman's table Discovery and Dyspeptic Cure, She albert we bottles of it, and now finds hern two bottles of it, and now finds hern better health than she has been for

has recorded on his phonograph the twail of his baby. At the laboratory him so that he could not work a

Why don't you put her at the pho medicite yously.

Mr. Edison made no reply, but the next time his herr apparent did cry he was ready for her. In fact, he grew very impatient because she behaved remarkably well, and didn't cry within his hearing for a week. At ast his time came. The infant got her toes angled up in her stocking and uttered a maintive wall. The father seized her, thrust her nose into the funnel and set the nuctor around. Alast the flying bright brass governor amused her, and she stopped crying and began to laugh. Mr. Edison was disgusted. He shook her violently and screamed into her are, but she only chuckled and cooed. He was in despair. Happy thought! He would pinch her. He did pinch her, and she expressed her displeasure with vociferous howls. The facket waked up the nurse in the next room, and she flow in as the door in terror.

"What have you been doing now?" she indignantly demanded.

"That baby wouldn't cry for my phonograph, and I just pinched her so she would."

"I never was so abused in my life," said the Edison afterward. "But, I've got that aby's howls right here on this wax cylindsr."

Optice were sent to London, and they have line been traveling over Europe, but Mrs. Edison does not know it.

has again been demonstrated, this time by the Society of Science, Literature and Arts of London, Eng., who on April 10th of this year, after a thorough examination, made the following award.

REPORT ACCOMPANYING THE MEDAL.

Excess of praise is hardly possible when speaking of this new and superbly beautiful design, which is intended to meet the demand for a mere expensive exterior or cabinet, together utility of form, richness of ornamentation and delicacy of finish, this instrument will not only compare favorably with the best but surpass all organs of any make; while for strength and purity of tone, variety of expression and freedom of action it is far in advance of anything yet produced.

SIR HENRY V. GOOLD, Hon. Pres. Society Science, Letters and Art, London, Eng. REV. IRWIN COATES, M.A., Hon. Sec.

This certainly shows that the Musical Bachelors and Doctors of Oxford and Cambridge Universities know something about an organ.

PIANOS.

PIANOS.

The Musical Opinion and Music Trade Review, published in London, Eng. April 1, 1887, under the heading CANADIAN MUSICAL EXHIBITS AT THE COLINDIES EXHIBITION, has the following:

Referring to Piano Fortes of Messrs. Heintzman & Co., Dr. Stainer says as follows: "I much regret that, owing to the late period at which I was called upon to make a report, all the more important instruments exhibited by this firm HAD BEEN SOLD AND REMOVED. But those remaining fully justified their high reputation. An Upright Grand, which I examined was in every respect a fine instrument; the touch was sympathetic and had a good repetition; the tone was full and rich. I also tried a specimen style No. 9, which was equally deserving of unqualified praise."
