

Thus far "Phonography in full" has been the object of this study.

The next few numbers shall be devoted to graduated exercises on same, in order to give the readers a thorough illustration of the first grade of shorthand.

With number 7, will begin a study of abbreviated Stenography. The intention is to show that as the first grade is simpler & plainer than any other system of shorthand, so also we may have our system of abbreviations or Grammatologues, which for rapidity of writing and facility of reading, will leave this system inferior to no other in the world.
