THE EMPEROR'S RECENT MESSAGE --- ANOTHER CRISIS IMPENDING -GERMANY PREPARING TO INVADE FRANCE.

New York, April 17 .- The World's London despatch ears the message of the Emperor William to the Esichstag calling for legislation in the interest of the working classes excited as much surprise here in official circles as at Berila It is believed to have been inspired by distrust in the existing Government of France and to cover the military programme, which will pretty soon be carried out on the first symptom of serious political disturbances in France. The correspondent has it on the best authority that, under orders issued from Berlin a fortnight ago, Eix divis lone of German cavalry and lour army corps have been got in readiness to cross the French frontier in three days' time. Some Pocialist leaders in Germany appear inclined to cut out work nearer home for this force by provoking disturbances among the German working classes; but as such an attempt would be disastrone to the people, it is not likely to be made. The real danger to Europe at this moment is at Paris, where the men in authority seem to be entirely incapable of understanding the danger to which they are exposing not only the peace of the continent but the existence of their own country.
