

From this point of view this Glass Enclosed Garden erected for Mr. Du Fresne at Pointe-Aux-Trembles, Quebec, Can., seems rather over dominant.

But from a point looking up the drive you see its scale is consistent.

## Your Glass Enclosure Problems How We Can Help You Solve Them

OUR ability is based on the fact that for over half a century we have been devoting our exclusive attention to the manufacturing, erecting and equipping of glass enclosures, such as Greenhouses, Conservatories, Porch Glass-Ins, Sun Parlors, and the like.

Our facilities are those of a recently completed modern factory at St. Catharines, Ont., under the charge of a native Torontonion, Mr. David Warwick, who has for a score or more

years been filling positions of responsibility in our organization.

The main sales office is at Toronto and in charge of Mr. C. C. McDermott.

Mr. Hildreth is in charge of the Montreal branch.

You will find us ready to cordially co-operate with you in both the solution and the execution of your Glass Enclosure problems.
