Feeding Machine
for Stone Crushers

(Invented by JOHN ROBINSON)
(Patented June 8th, 1909)

The CLIMAX ROAD MACHINE
HAMILTON, Ont.

Reeves, Wardens, Here's The Perfect Culvert !

Easier and quicker to put in place than any other ; cost less for freight and cartage ; stronger and far more enduring. Made of best Billet Iron, specially heavy gauge, shaped in semi-cylinders and corrugated under a pressure of SIXTY TONS to the inch. Then heavily galvanized AFTER shaping ; the only culvert so made, and therefore the only really RUST-PROOFED culvert.

Send to-day for free sample and Booklet 24 describing and illustrating Pedlar Perfect Culverts. Address place nearest you.

Shipped nested, in sections readily assembled into culvert shape. Flat flange-rib lock makes a perfectly tight joint, without rivets, bolts or other makeshifts, and quality increases strength. Only culvert with which you can break end-joints. Frost-proof, strain-proof, need no special ditching nor bracing. Suited to every purpose any pipe can serve.
