

1.2^{1/}

Scientific chemical name ^{2/} Structural formula ^{3/}	Quantity (metric tons)	Number and size of containers
<u>Key precursors for unitary systems</u> ^{4/}		

Scientific chemical name ^{2/} Structural formula ^{3/}	Bulk		Filled in munition/ submunition (metric tons)	Total quantity (metric tons)
	Quantity (metric tons)	Number and size of containers		
<u>[Key components] [Key precursors] for multi-component systems</u> ^{4/5/6/}				

^{1/} The view was expressed that these two tables were not necessary and the key precursors and key components could be declared under points 1.1.1, 1.1.2 and 1.1.3 as applicable.

^{2/} In accordance with the IUPAC (International Union of Pure and Applied Chemistry) Nomenclature.

^{3/} Different views exist whether it is necessary to state both the scientific chemical name and the structural formula in order for the declarations to be unambiguous.

^{4/} To be declared separately for super-toxic lethal, other lethal and other harmful chemicals.

^{5/} Identified in accordance with approaches to be worked out in the context of Article II.

^{6/} Some delegations suggested that multicomponent chemical weapons should not be declared as a special category in a separate table.
