

siles and Space Company, en préparation d'une série de livres (Addison-Wesley, éditeur probable). «Electronic Spectra of Diatomic Molecules», R. W. Nicholls; chapitre 7 de «Electronic Structure of Atoms and Molecules», vol. 3 de «Advanced Physical Chemistry» (publié sous la direction de H. Eyring, D. Henderson et W. Jost), (Academic Press, New York), sous presse, 1969. «Thermal Radiation Phenomena, Volume I, Radiative Properties of Air», publié sous la direction de R. K. M. Landshoff et J. L. Magee. Avec B. H. Armstrong, D. R. Churchill, B. E. Freeman, S. A. Hagstrom, R. K. M. Landshoff, R. W. Nicholls et O. R. Platas, pages xvi + 648, The Plenum Press, New York, 1969.

Divers: Fashion in Physics, Physics in Canada 14, 15-23, 1958, R. W. Nicholls. Science and Society, Business Quarterly de l'université Western Ontario 23, 222-226, 1958, R. W. Nicholls. Research and Canadian Industry, The Business Quarterly 28, 12, 1963, R. W. Nicholls. Laboratory Astrophysics and Space Science, Can. Aeronautics and Space J. 10, 163-168, 1964, R. W. Nicholls et H. I. S. Ferguson. Some Further Aspects of Laboratory Astrophysics and Space Science, Can. Aeronautics and Space J. 10, 309-312, 1964, J. I. S. Ferguson et R. W. Nicholls, Physics and Experimental Space Science at York University, Physics in Canada 22, 47-49, 1966, R. W. Nicholls. Astronomy and Astrophysics at York University, Journal of the Royal Astronomical Society of Canada, 63, pages 87 à 89, J. A. Innanen et R. W. Nicholls.

Rapports scientifiques commandés: Scientific Reports of Contracts: 1.1 Contrat AF 19(122)-1470: 1. Intensity Measurements of Molecular Spectra, I. Spectroscopic Intensities and Photographic Blackening, R. W. Nicholls, le 22 octobre 1952. 2. Excitation of Molecular Spectra, I. The Ionisation in Air Maintained by a Uniform Plane, Circular Distribution of α -Radioactivity, R. W. Nicholls, le 1^{er} novembre 1952. 3. Transition Probabilities of Molecular Band Systems, I. Transition Probabilities and Intensities of Molecular Spectra, R. W. Nicholls, le 20 novembre 1952. 4. Transition Probabilities of Molecular Band Systems, II. The Computation of Vibrational Transition Probabilities for Diatomic Molecules, W. R. Jarman et R. W. Nicholls, le 5 décembre 1952. 5. Transition Probabilities of Molecular Band Systems, III. Calculation of Intensities in the Electronic Spectra of Morse Molecules (I), P. A. Fraser et W. R. Jarman, le 3 janvier 1953. 6. Excitation of Molecular Spectra, II. The High-Voltage Arc in an Argon-Nitrogen Mixture, R. W. Nicholls, le 10 janvier 1953. 7. Transition Probabilities of Molecular Band Systems, IV. Calculation of Intensities in the Electronic Spectra of Morse Molecules (II), W. R. Jarman et P. A. Fraser, le 2 février 1953. 8. Transition Probabilities of Molecular Band Systems V. Collected Results N_2 , N_2^+ , NO, O_2^+ , W. R. Jarman, P. A. Fraser et R. W. Nicholls, le 16 février 1953. 9. Remarks on the Role of Absorption in the Spectrum of Polar, Aurora and of the Night Sky, Mme. A. T. Vassy, le 20 juin 1953. 10. Transition Probabilities of Molecular Band Systems, VI. Collected Results: N_2 , N_2^+ , CN, C_2 , O_2 , TiO, P. A. Fraser, W. R. Jarman et R. W. Nicholls, le 1^{er} juillet 1953. 11. Transition Probabilities of Molecular Band Systems, VII. Two Improvements in the Analytic Method Calculating approximate Relative Vibrational Transition Probabilities, W. R. Jarman et P. A. Fraser, le 1^{er} août 1953. 11a. Transition Probabilities of Molecular Band Systems, N_2 OH, CO, CO^+ , W. R. Jarman, le 26 octobre 1953. 12. Transition Probabilities of Molecular Band Systems, VIII. A Method of Determining the Electronic Transition Moment for Diatomic Molecules, P. A. Fraser, le 1^{er} janvier, 1954. 13. Transition Probabilities of Molecular Band systems, IX. Two
