

The Northey Gas or Gasoline Engine.

JUNIOR MODEL.

This little motor is giving the greatest satisfaction throughout Canada for its handiness, safety and ease of operation. It is especially adapted for running Pumping Machinery or any isolated plant requiring small power. The running expenses are very light. Any one can manage it—thus dispensing with expensive skilled help. Runs for hours without attention. Gets up full speed in less than a minute—is always under control. Any desired speed can be attained by regulating the fuel supply. Uses either Gas, Gasoline or Natural Gas for fuel. Send for Illustrated Booklet.
