and definitely restored. 'Disorders must be suppressed and revolutionary governments must be put down by all legal means. The measures you take must be carefully considered. The struggle begun is against the enemies of society, and not society itself; consequently wholesale respite cannot be approved of.

"Imprudent and illegal acts are likely to give rise to discontent, instead of conducing calm, and cannot be tolerated. The intentions of the Emperor are inevitable.

"The government firmly desires to procedure and the laws hitherto enforced, which no longer serve their purpose. The old regime will be regenerated, but order must be fully maintained. "You must act on your own initiat-
