**A NEW SWIMMING POOL**

(Continued from Page 3)  
it would mean that other Canadian and American universities would not hesitate to put UNB on their yearly schedules and indeed, UNB could place well up in the hierarchy of Intercollegiate swimming.

With a new pool, he would have ample training ground in which to produce Olympic-calibre swimmers as indeed he has come close to doing.

**INCO DEVELOPS WORLD MARKETS FOR NICKEL**

**IN THE UNITED STATES  
STAINLESS STEEL  
UMBRELLA**

Watching a play or listening to music under the stars is a wonderful experience... until it starts to rain. A new all-weather auditorium in Pittsburgh, Pa., solves this problem with a nickel stainless steel dome. Eight huge sections nest together when the dome is open. At the first sign of rain, push a button... and the sections glide quietly around a track to form a stainless steel umbrella—and on with the show!

**IN CANADA  
STAINLESS STEEL  
SKYSCRAPER**

Nickel stainless steel curtain wall panels were used for the new Union Carbide building in Toronto.

**IN FRANCE  
A NEW EXHIBITION CENTRE**

More than 40 tons of nickel stainless steel were used for interior and exterior applications for the new exhibition centre near Paris.

**IN ITALY  
A MODERN  
OFFICE BUILDING**

Extensive use was made of nickel stainless steel in the headquarters of Celestri & Co. S.p.A. in Milan, Italy.

**New ideas in architecture build world markets for nickel**

Nickel strengthens stainless steel, increases its resistance to corrosion, makes it easier to fabricate. As an architectural material, stainless steel harmonizes beautifully with wood, glass, tile and enamelled surfaces, withstands weathering and requires little maintenance. Today, leading architects in many countries are using nickel stainless steel more and more for bold new concepts in design.

Canada is the world's largest producer of nickel. And Inco, through sales, research and market development operations, maintains a continuing program for the expansion of international markets for Inco nickel.

Pacing the growth in these markets, Inco continues to add new production facilities in the Sudbury, Ontario area and has developed an entirely new source of nickel at Thompson, Manitoba.

More Inco nickel than ever before will be exported to Inco's expanding world markets... helping to build trade balances, stimulate Canada's economic growth and create more jobs for Canadians.
