formula,  
strata-laid  
insulation—  
Beautifully  
finished vul-  
canized solid  
oak cabinet.

**BAKE**, roast, steam, stew, boil or fry your food  
in an "Ideal" Fireless Cookstove.

**SOME PEOPLE** have an idea that fireless cook-  
stoves are only good for boiling potatoes,  
soup, cereals, etc.

**TO COOK** all your meals in a tempting,  
appetizing manner without fire may seem  
impossible to you. But it's the simplest thing  
in the world.

To lock up an entire, uncooked meal in shining, seamless  
pure aluminum wells, forget all about it for hours, and  
when meal time comes, to find it piping hot, deliciously  
savory and tasty, ready to serve, seems like a fairy tale.

Yet thousands of women are cooking this way. They  
shop, read, visit or sew—whatever fancy dictates, while  
other women stand over hot stoves, with faces like beets,  
stirring, turning, basting, frying, etc. The food is wasted,  
often burned, fuel bills run up, nerves are on edge.

If you haven't a fireless cookstove, come in and let us show  
you what the "Ideal" will do for you—what we guarantee it  
will do, or write us and have us send some advertising matter.  
Cook the new, easy, better way and save time and money.

The "Ideal" Fireless Cookstove and the Square and Round Steam  
Cookers. Manufactured only by
