

Uterus, abnormalities of action of, in labour, 419
 abnormalities of, causing rupture, 440
 accessory horn of, 134
 bicornis, 134
 bi cornute with rudimentary horn, 134
 bi-manual compression of, 495
 cervix, see under *Cervix*.
 changes in, at eighth week, 59
 in tubal pregnancy, 161
 compression of fundus to empty, 311
 contraction ring of, 427, 428, 486
 curettage of, 210
 de Ribes' bag introduced into, 618
 didelphys, 134
 double, 134
 douching of, 554
 forty hours after delivery, 520
 from case of placenta prævia and puerperal infection, 517
 general tonic contraction of, in labour, 424, 427
 gravid, 59
 antelexion of, 132
 at eighteenth week, 61
 at end of second month, 59
 at term, 61
 at thirteenth week, 60
 backward displacement of, 125
 abdominal and vaginal examination, 128, 129
 clinical course and results, 127
 diagnosis, 127
 differential diagnosis, 129, 130
 methods of replacement, 132
 treatment of, 130
 changes in relations, 62
 changes in shape and size, 59
 hernia of, 133
 lateral obliquity of, 62
 measurements of, 62
 prolapse of, 133
 relations to peritoneal investment, 63
 retroflexion of, 125, 126
 retroversion of, 125
 thickness of wall, 64
 tumours of, 188
 with fibroid tumour, 458
 hour-glass contraction of, 486
 hydrostatic dilator in position in, 633
 immediate evacuation of, in abortion, 208
 immediately after delivery, 518
 incarceration of, 127
 inertia of, during labour, 420
 infection of, onset of, 544

Uterus, in normal labour, 246
 in puerperal infection, 538
 intra-uterine manipulations causing rupture, 439
 inversion of, 451
 involution of, in the puerperium, 519
 level of, at different weeks of pregnancy (diagram), 86
 local tonic contraction in labour, 425, 426
 lower segment, 55
 and cervix in normal labour, 247
 measurements, 248
 over-distension of, 437, 438
 malformations of, and pregnancy, 134
 manipulation of, *per abdomen*, 49
 obliquity of, 267
 palpation of, 285
 parturient, 246
 plugging of, 496
 polarity of, 250
 pressure within, direct, 258
 general or indirect, 257
 removal of, after Cæsarean section, indications for, 694
 retracting wall of, 219
 retraction of, excessive, 424
 loss of power of, 423
 rupture of, 436
 spontaneous, 442
 sacculatation of, 127
 stimulants for, in labour, 302
 structural changes in, during puerperium, 523
 in third stage of labour, 254—256
 tumours of, obstructing labour, 41
 two and a half days after delivery, 521
 with ovum of about ten weeks' gestation, 21
 with ovum of four weeks' gestation, 20

VACCINE treatment of septicæmia, 558
 Vagina, bacteriology of, 525
 douches for, 284, 527
 examination by, during labour, 29
 in second stage of labour, 299
 in puerperal infection, 540
 introducing hand into, 487
 lacerations of, 451
 operation on, position and coverings for, 622
 plugging of, 479, 480
 in accidental hæmorrhage, 4
 preparation of, for operation, 62
 violet coloration of, 66, 82, 88
 walls of, softening of, 88
 Vaginal Cæsarean section, 641, 705
 Varicose veins in pregnancy, 135, 179
