## QUESTIONS AND ANSWERS. Veterinary.

### OBSTRUCTED TEAT

Some time ago I felt a lump in heifer's  
teat, and now the kernel or lump inter-  
feres much with the milking. The lump  
is about 2½ inches up the teat, or just  
below its junction with the udder, and is  
about the size of a grain of corn.

R. W.

Ans.—Such an obstruction can only be  
removed by a delicate operation, and  
cannot be done with positive assurance of  
success. Unless the animal is a valu-  
able pure-bred, we would fit her for the  
block, after she is past her flush. In  
the meantime, it may be advisable to dry  
up the affected quarter.

### SORE SHOULDER.

Mare not accustomed to work was used  
two days in hauling stones. She be-  
came lame in left shoulder, and a lump  
as large as a man's hand and two inches  
thick appeared. I applied liniment, and  
the swelling appears to be going down,  
but she is still lame, and drags the foot.

J. H. T.

Ans.—This is what might reasonably be  
expected. The mare must be allowed to  
rest. Bathe the shoulder well three  
times daily with hot water, and apply a  
lotion made of one ounce each acetate  
of lead and sulphate of zinc, and one  
dram of carbolic acid, to a quart of  
water. It is probable the swelling will  
gradually disappear, but if a tumor  
forms, which is possible, it will have to  
be dissected out, and the wound stitched  
and dressed with the above lotion, until  
healed.

### Miscellaneous.

#### BELGIAN HARES WANTED.

Would you kindly tell me, through your  
paper, where I could get Belgian hares,  
as near Nova Scotia as possible?

G. S. S.

Ans.—Keepers of Belgian hares or other  
classes of pet stock would find it to their  
advantage to list the same in the  
"Farmer's Advocate." Our "Want and  
For Sale" column is set apart specially  
for such a purpose.

#### SUFFOLK PUNCH, "SAMSON."

An enquiry having appeared in one of  
our June numbers for information about  
the Suffolk Punch horse, Samson, a  
correspondent writes his number is  
(2751) in the Suffolk Studbook, Eng-  
land; foaled 1898; color light chest-  
nut; 16½ hands; weight 1,650 pounds;  
sired by Stone Prince (2540), he by  
Guelph Champion (2538), dam Orange  
Blossom (3207), by Enterprise (1934);  
owners Jno. Finch and F. Thompson,  
Clear Creek, Norfolk Co., Ont.

#### A NOVA SCOTIA WEED.

Enclosed find sample of weed which is  
becoming very prevalent in this part of  
the country. Can it be gotten rid of?  
N. S. A. H. C.  
Ans.—This is tufted vetch (Vicia  
cracca), one of the vetch family. It is  
not generally regarded as a particularly  
noxious weed, and succumbs to the  
ordinary vigorous cultivation and crop  
rotation that checks Canada thistle and  
other perennial weeds. If anyone has a  
farm infested with weeds, let him try a  
four-year crop rotation, consisting of one  
year in grain, two years in clover and  
meadow, and one year in a hoed crop;  
or if that makes too much hoeing, part  
of the land for hoed crop can be sown to  
peas, barley or oats. The practice of  
such a rotation should soon check the  
worst weeds, provided the land is in-  
telligently cultivated.

### GOSSIP.

#### THE COMING JERSEY SALE.

Dairy farmers and all interested in good  
butter cows should bear in mind and ar-  
range to attend the grand dispersion sale  
of the Lake Roy herd of Jerseys be-  
longing to Mr. John O'Brien, of West  
London, Ont., to be sold at his farm,  
three miles from the city of London and  
one and a half miles from Hyde Park  
station, on Thursday, August 18th. The  
reputation of this herd for well-shaped  
udders and well-placed teats, for credit-  
able milk and butter production and  
prizewinning whenever shown should at-  
tract a good attendance and buyers from  
all parts of Ontario. It is seldom in-  
deed that so good a herd is offered at  
the buyer's own price in this country.
