

# Drugs Have Killed More People THAN WAR, PESTILENCE AND FAMINE.---Dr. Jno. M. Goode.

**"Medicine not a Science," But "An Ineffectual Speculation."—These and Other Unsparring Criticisms of Their Own Profession Are Made by Eminent Physicians.—Prominent Doctor Tells Why Drugs Don't Cure.—Electricity The Remedy of To-Day.**

SHALL WE THROW PHYSIC TO THE DOGS? Has medical science made no progress, and are all drugs poisons?

"The science of medicine is founded upon conjecture and improved by murder," declares one of the greatest physicians in the world, Sir Astley Cooper, M.D., physician to the Queen of England.

"Drug medicines do but cure one disease by producing another," asserts Dr. Martin Payne, professor in the New York University Medical College.

"A mild mercurial course and mildly cutting a man's throat are synonymous terms," says Professor Gilman, of the New York College of Physicians and Surgeons.

More and more eminent physicians are declaring each year that medical science has made little progress since the beginning of man.

Dr. M. O. Terry, formerly surgeon-general of New York, announced recently that in his opinion very few of the cases diagnosed as appendicitis were that disease at all, and says that in many cases where operations were performed for appendicitis a short vacation or a series of morning walks would have prevented the serious turn taken by the disease.

Dr. Osler, of "chloroform-age" fame, says: Pain in the stomach nowadays is always appendicitis, and is recognized by the physician's wife over the telephone."

Dr. M. J. Rodermund, of Milwaukee, goes farther than either of these. He declares: "It is an absolute impossibility for the appendix in a man to become obstructed. I have witnessed and assisted in thirty-four operations of so-called appendicitis, but never have I seen a diseased appendix. Yet I have seen a number of healthy, blooming young men and women sent to the angels just because the surgeons wanted the fee of three to five hundred dollars. I mean just what I say; that it was absolutely the fee only, and the surgeons made no bones about saying so before the operation was performed."

**NINETY PER CENT. NOT APPENDICITIS**  
Dr. A. B. Stockman quotes the statement of a physician at a meeting of physicians in Boston. This doctor has performed more operations for appendicitis than any other American doctor. He declared at the Boston meeting of doctors that 90 per cent. of the cases in which he operated for appendicitis proved not to be that disease at all.

"We always tell a patient and his friends that the operation was successful," he said.

Dr. Albert Lellingwell, of the American Humane Association, says: "I do not believe that the average length of human life would be diminished by an hour if all the drugs of Christendom were dumped into the sea—barring, perhaps, half a dozen."

medical facts are medical lies, and medical doctrines are, for the most part, stark, staring nonsens.

Dr. Albert Lellingwell, of the American Humane Association, says: "I do not believe that the average length of human life would be diminished by an hour if all the drugs of Christendom were dumped into the sea—barring, perhaps, half a dozen."

**DO YOU Take DRUGS?**

patent-medicine makers have fooled the public so often by printing bogus letters that it is hard to believe any. Every testimonial I publish is genuine, and I have a standing reward of \$1,000 for proof that any of them were bought.

**DON'T TRY TO FOOL NATURE**

"Few people realize the danger in drugs until their health is gone or their nerves and vitals wrecked by poisonous mixtures.

"Then you can understand how useless it is to try to fool nature with stimulants, narcotics and poisons.

"The ostrich hides its head and thinks he is out of reach of the hunter's rifle. Some people do things just as absurd.

"You cover up the symptoms of a disease and imagine you are cured. Just as soon as you stop using the drug the trouble returns worse than ever.

"You have got to remove the cause before you can cure any ailment.

"If you have a splinter in your finger, the only way to get rid of the pain and inflammation is to get the splinter out. Of course, you could take morphine or cocaine and relieve all pain for a while, but that wouldn't remove the splinter which causes it.

"The reason for nearly every chronic ailment or disease is a want of vitality and energy by some part of your body machinery.

**WOMEN SAVED FROM BUTCHERY**

"Thousands of women submit to dangerous operations which could easily be avoided by the use of my Belt. But the average woman imagines that the only thing to do, after drugs fail, is to resort to the surgeon's knife.

"Most female complaints are the result of low vitality, or weak, impoverished nerves. Where there is a deficiency of vital nerve force there is bound to be sluggish action of the organs affected, and then disease."

"My Electric Belt saturates the nerves with a gentle stream of electric life, enabling them to keep up a vigorous and regular action of all the organs of the body. It builds up vitality and strength in every weakened part, thereby removing the cause of disease.

"A great number of people suffer from pains and aches called rheumatism, or lumbago, or neuralgia, caused by impoverished nerves crying for aid. The life of these nerves is electricity, and nothing else will cure them. I can send a gentle current from my Belt so that it will convey the life direct to the ailing part and relief is often felt in an hour. I frequently cure such cases in ten days.

**ABOUT CONCERNS WHO ADVERTISE**

"There is a whole lot of prejudice against concerns who advertise. There is no doubt to the large number of quacks and schemers that have foisted worthless treatments on the public during the past few years.

"If it were not for this prejudice I would not be able to handle all the business that would come to me. The many fake electric belts and batteries advertised by charlatans, have made everyone skeptical, but I know that I have a good thing, and I'll hammer away until everybody knows it.

"Any organ of the body, any part that lacks the necessary vitality to perform its natural functions, can be restored by my method.

"It gives strength; it makes the blood rich and warm; it vitalizes the nerves and puts vim into the brain and muscles; it just makes a good man out of a bad one in every way.

"With my Belt I cure rheumatism in its worst forms; I cure pains and aches, weak nerves, general debility and any other trouble which can be cured by restoring strength.

"No matter where you live, you can be treated as successfully as if you were here at my office—as this is a home remedy."

**BOOK WORTH \$1.00 FREE**

To any man or woman who will mail me this coupon I will send free (closely sealed), my finely-illustrated book regarding the cause and cure of disease. This book is written in plain language, and explains many secrets you should know.

Don't spend another cent on doctors and their worthless medicines.

My Belt cures to stay cured. You should know about it. Don't wait another minute.

Cut out this coupon right now and mail it, if you can't call. I'll send the book without delay, absolutely free.

Free Test of my Belt to those who call.

Office hours—9 a. m. to 6 p. m.; Wednesday and Saturday until 8:30 p. m.

Put your name and address on this coupon and send it in. Cut the coupon out this minute and save it.

**DR. M. S. McLAUGHLIN,**  
112 Yonge St., Toronto, Can.

Dear Sir,—Please forward me one of your books, as advertised.

**THE CONVICTION OF EXPERIENCE.**  
I declare, as my conscientious conviction founded on long experience and reflection, that if there were not a single physician, surgeon, midwife, chemist, apothecary, druggist nor drug on the face of the earth, there would be less sickness and less mortality than now prevail.—James Johnson, M.D., F.R.S.

A physician writing recently in one of the magazines, said that the practice of medicine was not a science at all, and that no one could say that any cure had been made by medicine, because nature worked its own cure. There was great power in the human body to throw off disease, and in the majority of cases where the patient recovered, it was not because of the medicine given, but in spite of it.

**MEDICINES ARE POISONOUS.**  
In their zeal to do good, physicians have done much harm; they have hurried to the grave many who would have recovered if left to nature. All our curative agents are poisonous, and as a consequence every dose diminishes the patient's vitality.—Dr. Alonzo Clark, Professor in the New York College of Physicians and Surgeons.

This writer urges the medical fraternity to drop the nonsensical mystery with which it seeks to surround itself. Rhubarb will do as much good when ordered in English as in dog Latin, he says. Senna will not be a bit more agreeable as "Fol. Sen." nor cream of tartar as "Bitar. Pot." A mixture to be taken at bedtime might just as well be written that way as "Mixt. h. s. Sunda." And pure water would be equally as efficacious if written that way as when written "Aqua Pura."

**SCORES "PRESCRIPTION NONSENSE"**  
"This nonsense about the writing of prescriptions is on a line with all other frauds of the medical profession," says this writer. "It is a business of pretensions, misrepresentations and frauds."

Even such a high authority as The London Lancet said in a recent issue:

"In medicine and surgery, as in all arts and sciences, methods become general, they lapse into disuse, to be revived possibly at a later period and then to achieve a popularity which attaches to a supposed new thing."

Some of the most eminent physicians were asked recently to give their opinions of medicine and medicinal doctors. A few of the replies are here given:

Dr. C. E. Page, Boston, Mass., says:

"From the time in which the Father of his Country, afflicted by a simple and readily curable malady, pharyngitis, was killed by bleeding, up to the most recent catastrophe (February 3, 1907), of a needless operation for appendicitis, which killed a distinguished New York statesman, such operations have killed no end of good men and women."

Prof. Oliver Wendell Holmes, who was for many years one of the medical faculty of Harvard Medical School, said before his class:

"The disgrace of medicine is that colossal system of self-deception in obedience to which mines have been emptied of their caking minerals, the vegetable kingdom robbed of all its growth, the entrails of animals fayed for their impurities, the poison bags of reptiles drained of their venom, and all the conceivable abominations thus obtained thrust down the throats of individuals suffering from some fault of organization, nourishment or vital stimulation."

Dr. Valentine Mott, the great surgeon, says: "Of all sciences, medicine is the most uncertain."

Dr. Abercrombie, Fellow of the Royal College of Physicians of Edinburgh, says: "Medicine has been studied by philosophers the art of conjecturing; the art of guessing."

Dr. Jacob Bigelow, formerly President of the Massachusetts Medical Society, says: "The premature death of medical men brings with it the loss of the wisest and best of our medicine is still an intimation of the fact."

Prof. Gregory, of the Edinburgh School of Medicine, said to his medical class: "Gentlemen, you can of every 100

**THE BEST DOCTOR.**  
No doctor can cure all diseases. That's all "moonshine." They are "pretenders." If you can't cure a man, let him go. Physicians are a many of them. Believe that the best doctor is the one who knows the worthlessness of medicines.—Dr. Wm. Osler in an address to physicians.

When any of these organs break down or become inactive, sickness or disease results. Now you can't cure the trouble until you remove the cause—repair the part that is broken down. The only way to do this is to give nature the power to do it. All you need is motive power, electricity. You can't get that from drugs. My method is to restore this electricity wherever lacking, and pain and disease will disappear. That's the natural way of curing. "When I say that my remedy cures, I don't ask you to believe me until I prove it. I have one or more cured patients in nearly every town on the map. I'll send you the names of those near you, and you can ask them about my treatment."

MR. JAMES WAY, OF OTTER LAKE, QUE., says: "Words would fail to tell you the good that your Belt has done for me. At the time I got it I had been an invalid for nearly two years. Some of the ailments I had for over twenty years. Well, sir, I don't know God bless you, and Thank God that such a thing was ever discovered by the art of man, he cured me. The rheumatic pains prevented me from sleeping or walking. One night, when suffering greatly and could not sleep, I placed it around my leg, and after six hours' sleep, I awoke as free from pain as when ten years old. The next night I applied it to the other leg, with the same result, and have not had any pains since. It has done its work, and I would not sell it or exchange it for any other Belt. I expect that, through my recommendation, you will sell not less than a dozen Belts, as a great many came to me to find out the results in my case, and found me walking and working the same as thirty years ago. I told them that it was Dr. McLaughlin's Belt that had done it all. Now, sir, you can use my name in any way, as I am prepared to vouch what I say was true. Hoing the Lord will bless you, and that you will be ever successful in your business."

Another gratified man, MR. A. F. SPITTLER, OF BLACK RIVER, N.S., tells his experience with my Belt: "It is with the greatest pleasure that I write to you to let you know what your Belt has done for me. I have never found anything to equal it for my trouble. The greatest thing that seems to me is, when people come around and say, 'Why, you can get about better now, and you have no more asthma.' Then I say that I took medicine for 15 years, but Dr. McLaughlin's Electric Belt cured me in less than 6 months. Now, I want to thank you from the depth of my heart for what you have done for me, and whenever I get an opportunity to recommend your Belt, I will do so, wishing you every success."

MRS. HUGH KERR, OF PARIS, ONTARIO, signs her endorsement: "It was just two months to the day that I laid aside the Belt, all my pains and aches gone. I had hoped for a long time to come. If it cured nothing but the sleeplessness, I would be well paid for my investment. As I told you a month ago, it is many a long year since I enjoyed a good night's sleep as I now do. I do not lay awake any more at night when others are sleeping. I am sleeping, too, and soundly at that, and feel refreshed in the morning when it is time to rise. I feel towards your Belt as you say, like one who has found a good friend who has done them a great deal towards a good friend who has done them a great deal. No doctor's skill could or ever did me so much good as your excellent Belt has. I am done buying quacks or doctors' prescriptions for the future. What can I say?"

"I know that many people are skeptical about testimonials, and they have a reason to be. Quacks and
