DR. WILLIAMS' FLY AND INSECT DESTROYER

Destroys all fly pests—will certainly keep flies off all kinds of stock. The cows give more milk. The best disinfectant for stables, hog-pens and poultry houses. Spray your work-horses and not a fly will come near them. Guaranteed or money refunded. The best preparation in the world for keeping flies off stock. Put up in quart cans at 35c.; 1/2-gals. at 65c.; 1-gal. at \$1.00.

Don, Aug. 6th, 1910.

Gentlemen.—We have used Dr. Williams' Fly Destroyer on our herd of Jerseys for some years, and find it the most satisfactory preparation we have ever used, because it does certainly keep flies off.

D. DUNCAN & SON, Breeders and Importers of Thoroughbred Jerseys, Don, Ont.

Islington, Sept. 4, 1910.

Gentlemen.—I cannot say too much in favor of Dr. Williams' Fly and Insect Destroyer. I think it is the best preparation in the world for keeping flies off stock. It is also a splendid preparation for killing lice on cattle in winter.

J. B. WOLFE, Islington.

Britannia, Sept. 9, 1910.

Gentlemen.—Dr. Williams' Fly and Insect Destroyer is the best preparation we have ever used for keeping flies off stock. It is simply cannot live where it is used. All farmers in our locality use and recommend it.

QUESTIONS AND ANSWERS. Miscellaneous.

PARTNERSHIP IMPLEMENT.

A and B are two adjoining farmers. They buy an implement together, with the agreement that each use it to do his work, and each pay half the purchase price. After some years they fall out. Now, A, who has implement in his possession, says he will not allow B to use it again unless B buys A's share; or A will sell his share to B. Can B hold A to agreement, or will B be forced to come to A's terms? SUBSCRIBER, Ontario.

Ans.—The agreement is still binding on A, and B is entitled to hold him to it.

LIME-SULPHUR.

I notice in the Spray Calendar of April 6th, commercial lime-sulphur. Where can this be bought, and at what price? Also B2, or D, with a poison. What kind of poison, and how much to 40 gallons? F. J. B.

Ans.—Commercial lime-sulphur and arsenate of lead (arsenate of lead being the only poison it is safe to use with lime-sulphur) have been advertised in "The Farmer's Advocate" for two or three seasons by two companies, viz.: The Niagara Brand Spray Co., of Burlington, Ont., and the Chemical Laboratories, Ltd., 148 Van Horne street, Toronto, Ont. It can be purchased at about \$8 per barrel of concentrated solution, plus cost of transportation, amounting to about \$1 per barrel. Full explanation of the key letters asked about will be found on the same page as the Spray Calendar.

POULTRY QUERIES.

1. What is a sure cure for bunions and warts?
2. We have about twenty-five hens and two old roosters and ten young ones. The hens are all in a good, healthy condition, but the backs of their heads are all bare, and some of them have scabs on the bare places.
3. Are turkeys hatched in the latter part of May or first of June, too early?
4. When is the right time to set goose eggs?
5. Where can I obtain a book on the raising of turkeys right from the day they were hatched?
6. What is the cause of my duck laying about four eggs and then stopping? She is well fed, and has her liberty all the time, and is with the drake.
7. Are ducks better when shut up than when they are running around the yards and in mud-puddles?
8. How many goose eggs can a good-sized Silver-laced Wyandotte hen cover?

Ans.—1. Real sure cures are scarce. Warts are growths, the appearance of which on animals cannot be prevented, and all that can be done is to treat them as they appear. Those with constricted necks should be cut off with a knife or pair of shears, and the raw surface dressed with butter of antimony, applied with a feather, once daily, for a few days. Those that are flat or have a broad base, should be dressed daily with butter of antimony until they disappear.

If your stock were equipped with proper fitting shoes, they would not be troubled with bunions.

2. Twelve roosters to twenty-five hens are ten too many. No wonder there is trouble. Separate ten of the roosters from the hens or kill them off.

3. The latter part of May or the first part of June is not too early to have young turkeys hatched.

4 and 8. If a goose is a good layer, the first dozen or so of her eggs may be set as soon as laid, setting hens being used to hatch them. A hen will cover from five to seven goose eggs.

5. "Turkeys, Their Care and Management for Exhibition or for Market," is the title of an excellent work, which may be ordered through this office. Price, 75 cents, postpaid.

6. It is impossible for us to say just what is the trouble. A duck may be overfed, and thus her laying powers injured, or poor individuality may be the cause of stoppage of egg-laying, or there may be other causes at work.

7. Breeding ducks are the better of plenty of exercise, but, when early fattening is the object, it is better that they be confined to small yards.
