

Bale your Hay Quicker, Better, Cheaper!

THE DAIN Steel Hay Press

Perfect results are what you get when you use a

Dain Double-Gear, Belt-Driven, Steel Hay Press

Carefully and substantially built of high-grade materials, it will give lasting service under the heavy strains and trying usage to which a hay press is subjected.

Wherever steel is better than wood, steel is used in its construction. Outdoor exposure does not affect the DAIN. It doesn't warp or swell like a wooden press.

WHETHER YOU HAVE

a press or contemplate having one, you should ask for our free catalogue, giving sound and valuable information on the subject. There is a DAIN Press to suit every pocketbook. Any DAIN Press will be the best press investment you could make at its price.

DAIN MFG. CO., LIMITED, 90 DAIN AVENUE WELLAND, ONTARIO

"BAKER" Wind Engines

The "BAKER" Wind Engine is built for heavy duty. Neat and compact in design. Do perfect work because they are built on principles that are absolutely correct, and the easiest-running mill made.

The wheel is built on a hub revolved on a long stationary steel spindle. As a result there is less friction.

It has a large number of small sails without rivets. The small sails develop the full power of the wind.

The engine is so constructed that the gears cannot wear out of mesh.

Has ball-bearing turntable, and self-regulating device.

All working parts are covered with a cast shield, thus protecting same from ice and sleet.

We make a full line of steel towers, galvanized steel tanks, pumps, etc.

All goods fully guaranteed. Write for catalogue No. 58.
