Maple Grove Yorkshires
 We now offer a few good young sows bred by S. H.
 Jack (Imp.) 28515, breeding age. We have also a large
 number of March and April pigs out of such sires
 as Oak Lodge Julius, S. H. Jack & M. G. Chester
 6th. Pairs not related. We have farmers' pigs
 at farmers' prices and can handle orders large or
 small. S. H. Jack (Imp.) 28515, champion boar for
 three successive years at Toronto, our main sire.
 S. H. Romeo 28553, sire by S. H. Worley 4th
 25881, another Toronto champion, is a younger sire
 of great individuality. Write us your wants, we
 will attend to them promptly and satisfactorily.
 Our stock of young pigs is par-excellence.

 Bred from prize-winning stock of England and Can-
 ada. Have a choice lot of young pigs of both
 sexes, pairs not akin, to offer at reasonable prices.
 Guaranteed satisfaction. **Joseph Featherston &**
Son, Streetville, Ont.

People in a Missouri town are telling
 this little story on a lawyer there. It
 happened in Judge Tedford's court, and
 the witness was a negro woman, whose
 reply to every question was "I think
 so."

Finally the opposing lawyer rose and
 pounded on the desk. "Now, look here,"
 he roared, "you cut that thinking busi-
 ness and answer my questions. Now
 talk."

"Mr. Lawyer Man," said the witness,
 "Mr. Lawyer Man, you will have to
 excuse me. I ain't like you 'torneys. I
 can't talk without thinkin'."

Questions and Answers.

Miscellaneous.

Henhouse Plans.

Will you send me plans of a warm and
 inexpensive henhouse, which will accom-
 modate one hundred hens? L. F.

Ans.—We would advise you to get a
 bulletin entitled, "Farm Poultry," which
 may be had upon application to Prof.
 W. R. Graham, O. A. C., Guelph, Ont.

Saluting the Flag.

I am secretary of the school board
 here, and in visiting the school the other
 day, was asked by the teacher, "What
 is the proper way to salute the flag?"
 I could not answer, so thought I would
 ask "The Farmer's Advocate." T. Y.

Ans.—The usual salute is simply to
 bring the hand up to the head, touching
 the cap or hat.

Silage Queries--Pneumonia in Steers.

1. Would silage, put into silo in Sep-
 tember, 1913, be as good feed during the
 winter of 1914-1915, as it would be dur-
 ing the coming winter of 1913-1914?

2. If two feet of silage were still in
 the silo from last year, and as we keep
 only one cow, silage being fed to beef
 cattle, should such silage be taken out
 of silo before putting in this year's
 crop?

3. What would you think of two feeds
 of silage per day, and one feed per day
 of unthreshed rye, cut when green, for
 steers during winter, when they are to
 be fattened on grass the following sum-
 mer, or would it be better to let rye
 ripen, feed the straw, and a mixture of
 grains ground fed on the silage?

4. Is a steer that suffered from pneu-
 monia last winter more likely to be af-
 fected with same trouble next winter than
 if he never had had it?

SUBSCRIBER.

Ans.—1. Properly summered over, and
 the spoiled part thrown off the top be-
 fore putting on fresh, it should be.

2. Not necessarily. If the little bit
 of spoiled silage is removed before re-
 filling.

3. We would be inclined to prefer the
 mixture of grains, although you might
 use a part of the rye as hay, and the
 remainder to be mixed with other grains
 and fed as a light ration.

4. Possibly so. It may have weak-
 ened his constitution somewhat. On the
 other hand, he may never have a second
 attack. The thrift of the steer should
 be a fair indication as to whether or not
 it is likely to occur again.

Value of Skim Milk and Whey— Overrun

I am a constant and interested reader
 of your valuable paper, and admire your
 fearless stand taken on different ques-
 tions. I always look eagerly for Peter
 McArthur's weekly budget, which is cer-
 tainly refreshing. Would you please an-
 swer, through the medium of your paper,
 the following questions:

1. What is the cash value per cwt. of
 separated milk for feed for calves or
 hogs?

2. How many pounds of butter will
 100 lbs. of butter-fat make?

C. E. B.

Ans.—1. There is no uniform, fixed,
 cash value. It depends very much on
 conditions, such as the abundance and
 cost of stock which may consume it, the
 price of other feeds, the condition of the
 product as to sweetnesses, and the dis-
 tance, if any, that it may have to be
 hauled. Speaking generally, we consider
 that good, sweet, separated milk, fed
 warm on the farm where it is produced,
 should be worth at least 25 cents per
 cwt., and if raising calves or young pigs,
 we would rather pay 40 cents per cwt.
 for a limited quantity than
 to do without any. Pasteurized whey,
 in good condition, if not excessively di-
 luted with wash water, should be worth
 12 cents per cwt. for pig feeding. To
 get the full value out of either by-prod-
 uct, one must use it moderately in con-
 junction with other suitable feeds.

2. In ordinary commercial practice, it
 should overrun a sixth. That is, it
 should make 116½ pounds of butter.
 However, the overrun varies with many
 conditions, and fluctuates in the best
 creameries, going sometimes below and
 sometimes above this average standard.

ARE YOU INTERESTED IN

ROOFING

THEN write us a post card TO-DAY.
 Simply write the word "Roofing" and
 your name and address—that's all.

We'll send you full particulars by return
 mail.

We'll show you why Galt Steel Shingles
 make the best and most satisfactory roof for
 your barn—your stable—or your home.

It's worth your while to know this, and
 the cost of knowing is but One Cent (for the
 post card).

Just reach over and get a post card from
 your writing table NOW—before you turn
 this page. Address it to
