

ARE YOU GETTING THE MOST OUT OF YOUR TRACTOR?

ARE you getting the maximum power out of every cylinder stroke? Will your tractor be in as good shape next year as it is this? The answer to these questions rests upon one thing—proper lubrication.

# Polarine

FRICITION REDUCING MOTOR OIL

Buy Gasoline and lubricants under the Premier "Red Ball" sign.

has proved its worth to tractor owners who have given the lubrication problem real study. It keeps an unbroken lubricating film over the cylinder walls. It keeps its perfect lubricating body under the greatest cylinder heat. It flows freely at zero—and protects and preserves every moving part of the engine. Buy it in steel barrels direct from our stations.

Supplied in two grades—Polarine and Polarine Heavy

### Auto Tongue Truck on Deering and McCormick Binders SELF-STEERING FEATURE

The binder is purposely thrown out of square in this illustration in order to show clearly the steering action of the tongue truck wheels.

When the outer end of a binder platform starts to hang back, it pulls the tongue truck toward the grain.

Any movement of this tongue truck toward the grain turns the truck wheels in the opposite direction and at so great an angle that they automatically steer the binder back to its proper square cutting position, with the horses moving steadily straight ahead.

The truck wheels turn faster than the tongue as shown by the dotted lines.

## A Gain Worth Making

WITH the new auto tongue truck, Deering and McCormick 8-foot binders cut a full 8-foot swath. That means a quicker, easier harvest—a saving of time when time is worth money. The driver's work is easier, too; on the straight-away because the horses are not crowded into the standing grain; and at the corners because the binder turns a natural square corner.

The wheels of this new auto tongue truck are fitted with removable dust proof bushings equipped with hard oil cups. This construction does away with the expense of buying a new wheel every time a bearing wears out.

The new auto tongue truck is only one of the important improvements on these binders. For instance, compare the wide, strong, deep-bugged steel main wheels with those on other machines; and compare also the arrangement for keeping canvas running true, which make them last so much longer.

Decidedly these are the binders to buy. See the I H C local agent or write the nearest branch house for full information about their good features.
