Ontario municipalities will shortly petition the provincial government asking for a rebate of a portion of the gasoline tax collected within the municipalities.

Reports from country points indicate a shortage of hogs. This is not an undesirable situation for those who have hogs to sell, but it is annoying to those who sold breeding stock last fall and now wish to stock up.

A subscriber who came in to pay his subscription the other day, said he had not been able to sleep and thought it might be this unpaid subscription that caused his wakefulness. This has caused us some anxiety with regard to a few other people.

It is during a wet season that underdrainage shows to advantage. The cost of running a tile drain into low, wet, unproductive spots may be paid for in a single season by the increase in crop and greater ease with which the soil is worked. If plans are made to put in 1000 or 1500 tile a year it is surprising how soon the worst places on the farm will be drained and brought into heavy production.

In these days of housecleaning frenzy the distraught husband need not be surprised if Friend Wife has used his shaving brush for re-enamelling the bathtub and his razor to trim off the new oilcloth.

Dairying is one of the oldest and one of the most important of the industries of Canada. It owes its modern development to the introduction of the factory system for the

Dull, cold weather has delayed the fruit blossoms, necessitating extra labor and expense in spraying to control orchard pests. Thoroughness and spraying at the proper time, are imperative if pests and fungus are to be subdued and a clean crop harvested. Consumers want only first quality fruit, and if home producers cannot supply it the trade looks to other sources.
