Neither one knew in whose handwriting the articles in question appeared. His name was at the head of the paper as city editor, but that he had anything to do with the articles in question was not shown.

No evidence was introduced by the defense, Attorney Pattullo moving for a dismissal upon the grounds that no connection had been shownbetween the accessed and the libels. His honor held that his was only a preliminary examina-

Judge Dugas, in passing sentence, scored Rodenbuch unmercifully for his mode of life which made him despised by air decent people in the community. The evidence proved beyond question that for years he had been living upon the avaits of prostitution, and belonged, to a class of men who are despised. Rodenbach became hysterical during the judge's roasting and frequently applied a handkerchief to his eyes. As he was led away by an officer many bystanders were heard to say, "served him right."

He explained that he did not know that the oysters were bad and that he had no means of knowing, as the bivalves were in scaled cans. The court said this would set aside the theory of a gnilty knowledge and greatly mitigate the offense, but he contended that dealers should enquire into the character and quality of the goods they sell and have a reasonable knowledge of the same.

Laura Dupauvy and Francis Perinnett, who were placed in jail on Friday owing to the discovery of perjury in the Rodenbach case, were liberated later on, though the investigation will be continued.

The criminal calendar of the territorial court was concluded on Tuesday, and civil cases wif occupy the balance of the week.
