War News.

Messages Received Previous to 9 a.m.

OFFICIAL.

LONDON, June 18.

The French Government report

great activity during the past two

days. Fighting north of Arras de-

veloped extreme intensity. Import-

ant progress was made and almost

wholly maintained near Souchez and

Neuville. Eleven German divisions

were engaged and suffered extremely

high losses. Over six hundred pris-

oners were captured. There has been

considerable progress in the Vosges

and Alsace, where the Germans lost

500 prisoners. The Russian Govern-

ment reports severe engagements con-

tinue in Galicia between the San and the town

of Lubaczow. On the Dniester front

the enemy were thrown back between

the River Tysmenica and Strij, above

Zurawno. Nearly 9,000 prisoners

were captured with six guns and 21

mitrailleurs. The Italian Govern-

ment report satisfactory progress towards Trent, the

Carnic Alps, and on the Trentino

front. Near Montecoro 600 prisoners

were captured. DONAL LAW.

CANADIANS AGAIN UNDER FIRE.

OTTAWA, June 18.

The Canadians have again been in

the firing line. The First Brigade,

according to advices received here to-

day, has been in an engagement and

sustained a number of losses. The

exact location of the battle is not giv-

en out, but it is presumed that it was

at Festubert, where, according to Sir

John French, one line of German

trenches were taken in part, though

subsequently ground had to be yield-

ed. REPORTED BULGARIA HAS COME

TO AN AGREEMENT.

LONDON, June 18.

Reports are in circulation here that

Bulgaria has come to an agreement

with the Allied Powers. These reports

lack confirmation, although the buy-

ing of the Bulgarian Bosphorus is tak-

en in London as indicating that im-

portant events are near at hand. The

opinion is generally expressed here

that there is no chance that Bulgaria

will enter the war on the side of

Germany and Austria. Earlier in the

day, the strength of the Russian

Bourse and a sudden drop in ex-

change rates, led to the belief that the

Dardanelles Straits were on the point

of being penetrated, or that Russian

financiers had received some other

private news of great importance.

That some great coup is about to be

sprung is considered certain here,

for following their great reverses in

Galicia, the Russian markets could

not possibly have developed the sud-

den strength exhibited to-day.

BERLIN OFFICIAL.

BERLIN, June 18.

An official announcement is made

here to-day that an Allied force which

attacked a German position north of

La Bassée, in northwestern France,

was destroyed, only a few succeeding

in retreating.

NAVAL ACTIVITY IN ADRIATIC.

PARIS, June 18.

The Ministry of Marine gives out

an announcement as follows: The

Anglo-French naval forces in the

Ever Ready Hot Water, Night and Day.

HOT WATER FOR THE HOUSEHOLD.

When "Spring cleaning days" en-

gross the busy housewife then the

convenience of an unlimited supply

of hot water on the upper floors is

brought home to her with special

force.

But at all times—apart from con-

venience—a gas water-heater makes

an irresistible appeal to the house-

wife from the point of view of deal-

ing with the domestic problem.

Latter-day domesticity is difficult

to keep unless due consideration is

shown by saving then unnecessary

drudgery—and in the category of un-

necessary drudgery may be included

the toil of carrying hot water or coal

upstairs, the cleaning of grates and

the removal of dirt and ashes.

The gas water-heater renders such

labour superfluous—may12,tf

because it only heats the water actu-

ally required; and labour-saving, be-

cause there are no coals to carry, no

flues to clean, no ashes or dirt to

remove.

The master of the house has when

shaving water and a hot bath when-

ever he wishes without delay or

trouble.

The bath ready for baby, when

baby is ready for the bath" should be

an advantage of every housewife—who

should also keep in mind that any

trouble saved to the nurse makes for

a well-ordered, contented household.

Gas Water-Heaters, whether of the

Instantaneous or Circular type, offer

the convenience of available hot wa-

ter "upstairs, downstairs, and in my

lady's chamber,"—without any labour

at all—independently of the state of

the kitchen fire.

The cost is reasonable.

FOR THE BATHROOM.

An uncertain supply of hot water

in the bathroom is a frequent cause

of annoyance.

Hot water can only be secured,

usually, by getting the coal to act as

stoker, but at what a cost!

Think of the coal that is wasted—

the fatigue of coal carrying—the af-

ter labour of grate cleaning and the

discomfort of a hot kitchen in warm

weather!

A Gas Water-Heater is economical

Mediterranean, are now co-operating

with the Italian fleet, making possi-

ble the capture of the Austrian naval

base. The Austrians have 200,000

men in strongly entrenched positions

there.

BRITISH STEAMER AELSA SUNK.

LONDON, June 18.

The British steamship Aelsa, of

Leith, was sunk by a submarine to-

day, off the southeast coast of Scot-

land. The crew was saved. The

Aelsa was 876 tons gross, and built

in 1884.

MEYER GERHARDT INCIDENT IS

CLOSED.

WASHINGTON, June 18.

Secretary of State Lansing, late to-

day, authorized an announcement that

so far as the State Department was

concerned, the Meyer Gerhardt in-

cident was closed. He added that he

had never been officially called to the

State Department's attention except

through a denial by Ambassador

Bernstorff, who told him to-day that

he had no knowledge whatever of

any "Mr. Meyer."

FEMALE VOLUNTEER TAKEN PRISONER.

BERLIN, June 18.

Among the prisoners taken by Gen-

eral von Mackensen's army during

the fighting in Galicia, is the daughter

of a Russian Colonel. She was dress-

ed in the uniform of a one-year vol-

unteer, and had been fighting in the

ranks.

THE LUSITANIA FINDING.

LONDON, June 18.

Referring to the conclusion of the

Lusitania inquiry, Griffith, Secretary

of the High Commissioner's Office,

stated that while not presuming to

anticipate Lord Mersey's finding, he

believed that the trend of the evi-

dence was sufficient to indicate that

the intending litigants for compen-

sation would do well to consider

carefully before suing the Company.

INVESTIGATING AEROPLANE AC-

CIDENT.

PARIS, June 18.

The British Royal Naval Flying

Corps to-day began an investigation

into the aeroplane accident yesterday

which resulted in the death of Lieut.

Warford, the British aviator who

recently destroyed a Zeppelin, and

Henry B. Needham, the American

writer.

INDICTED FOR PERJURY.

NEW YORK, June 18.

Gustave Stahl, the German reser-

vist, who swore in affidavit, which

was submitted to the State Depart-

ment by the German Embassy, that

he saw guns aboard the Lusitania, was

indicted for perjury to-day by the

Federal Jury.

FRENCH GAINS.

PARIS, June 18.—(Official.)

In the sector north of Arras, a vi-

olent artillery duel has taken place to-

day. Our front remains unchanged.

We hold all the ground we have cap-

tured. In Alsace we have fortified

the positions which we took yester-

day, and continue to make progress

here. Our advance parties at the end

of the day reached the outskirts of

Metzeral. We have advanced along

both banks of the Pech, we hold

under our fire the enemy's commu-

nications between Metzeral and Mun-

ster. Further prisoners, machine

guns, and a very large quantity of

war materials, notably rifles and

cartridges, have been taken by us.

There is nothing to report concern-

ing the situation on the remainder of

the front.

SIR JOHN FRENCH REPORTS.

LONDON, June 18.

A report from Sir John French was

given out here to-night: The fight-

ing on the northern and southern

borders of our line of contact has

throughout June 16th, in co-operation

with the attack of our ally about Ar-

ras. East of Ypres all the German

first line trenches, which we cap-

t
