God's in His heaven, All's right with the world.

-[BROWNING

THE FIRST BYE-ELECTION. Though the most despicable means wer resorted to by the opponents of Reciprocity in order to secure a victory for trade restriction principles, Mr. Julius Scriver, the Liberal candidate for Huntington, Que., was victorious in the Dominion election held there yesterday.

An army of Ottawa officials and of political adventurers from Montreal swept down on the parishes on nomination Jesuit Estates' Act in last Parliament, and in the French-Canadian parishes of St. Barbe and Anicet the Conservative agents used the race and religion cry against him, while in other parts of the constituency they adopted diametrically opposite tactics. In this East Middlesex in the last Ontario local election. Mr. Tooley had one cry to one class of electors in London township; Mr. Hutchins to another in the adjoining townships of Biddulph and Stephen.

It is reassuring to know that these Is an able and upright representative, goes back to Ottawa to swell the constantly inpreasing numbers of the friends of reciprocity. The movement cannot be stayed; its opponents must either indorse it or be

those far-seeing men who admit that a shange must speedily come in the trade ponditions of the Dominion. At a meeting in Queen's College the other day, Dr. Strant said that "The National Policy, in its present shape, has won its last victory. Frade restrictions against the whole world than the bear of population in the intercensal period, 1871-81, has been maintained since 1881, the increase of population during last year would have been 394,685, or 86,418 in excess of the balance between births and deaths actually registered.

THE TALK OF PROTEST. "You can depend that London will shor

ly be given over to the turmoil of another contest for the Dominion House," is the declaration alleged by the Free Press to have been made by a member of Mr. Carling's Executive Committee after a meeting purporting to have been held last night. At that meeting, the organ informs us, it was resolved to protest the election, and try to unseat Mr. Hyman, M.P. Whether the protest will be gone on with, or will be merely entered as a bluft,

ever, to suppose that it was the meet-ing in the committee rooms that de-cided the question so far as it has gone. The caucus of lawyers and disappointed betting men, held at Mr. Carling's place on Saturday evening, really laid all the pipes and had the matter decided without the aid of the outside members of the party, many of whom are understood to be decidedly opposed to protesting an election that is known to have been exceptionally clean. They see no propriety in trying, at best, to unseat Mr. Hyman on a technical irregularity, even should a trial reveal such an illegality, and that is much to be doubted. Two things we do know: 1. That Mr. Hyman not only conducted his canvass strictly in accord with the law, but used every endeavor to have his triends "The Advertiser" is an organ of news follow his example. 2. That hundreds of good Conservative selectors are convinced of this fact, and that, in the event of the "turmoil of another contest" peing forced on the city, they will resent the conduct of the men who have rendered it possible, by voting for Mr. Hyman, who had a majority on March 5 sufficiently large to leave no doubt that he was the London.

One is not surprised to find that mem bers of the legal profession like Messrs. Essery, Bayly and Ed. Meredith were the principal speakers at the meeting last night, and that they were anxious for an election trial, with the expenditure of thousands of dollars in legal expenses that a fight of that description involves; but there is, as we have said, an independent Conservative view of the question, and it has been quietly promulgated since the talk of a pro-test by the disappointed betting men and the lawyers began. It is (1) that a protest should only be entered on the best of proof that the election can be upset, and (2) that

Meanwhile the friends of reciprocity and good government should be in a state of readiness for any emergency, maintaining the same attitude of conciliation and of friendly co-operation with those who favor their views, or who can be influenced by argument, that characterized them in the

recent campaign.
What, then, is the conclusion of the whole matter? Simply this: That the friends of Mr. Hyman are strong enough in hopes that the principle of freedom to trade their platform, in their organization and meet any combination that can be brought against them. They would prefer peace; but if war should come, then are they ready for it.

THE BRITISH CENSUS. In the taking of the British census of April 6 next, no one will be employed as an enumerator who has not given proof that he or she can do the work with thoroughness. For the first time in the history of the country, it is held that women are able to serve as enumerators, and in a number of districts women have been put on the lists. Each of the enumerators will have between 200 and 400 families to visit and count up. As to the duties of householders, the schedules must be filled up by Monday, April 6, when they will be called for, and "No person alive at midnight dwelling in the house or tenement on the night of April 5 is to be omitted from the schedule; no person dying before and no child born after down on the parishes on nomination midnight is, however, to be enumerated.

day, and remained till the close of the poll, No absent inmates are to be inserted; exusing every influence possible to secure the clection of the anti-reciprocity candidate. Mr. Seriver voted in opposition to the Two extra columns have heen added to the schedule, and the returns made in one of these will doubtless prove of great value, as affording information on the subject of the dwellings of the working classes and overcrowding. It is provided that the numparts of the constituency they adopted diametrically opposite tactics. In this couples less than five. The other column they resembled their friends in North and affects Wales only, and requires a return to

It is estimated that the population in It is reassuring to know that these views, together with the open bribes of promises of heavy expenditures of public money, were repudiated by the indignant electors, and that Mr. Scriver, who dignant electors, and that Mr. Scriver, who she and unright representative, goes 125-total, 38,227,321. The quarterly returns furnished by the local registrars showed that there were last year regis-tered in England and Wales 872,515 births and 564,248 deaths, the natural increase of Principal Grant, of Kingston, is one of those far-seeing men who admit that a thange must speedily come in the trade. SUGAR DUTIES.

After 1st April next the duty on ugar entering the United States will be taken off, and already all sugar for delivery after that date is being sold in the States at a reduction. The almost prohibitive duty imposed on refined sugar by the Dominion Government will prevent Canadians sharing in the boon of cheaper sugar thus set in motion.

The Montreal Trade Bulletin, however, gives currency to the report that the Otta-way Government "intends to make some remains to be seen. It is a mistake, howmaterial modifications in the duty on raw sugar as mentioned by us about four weeks ago, the proposed change being, it is said, the admission of the raw product into the Dominion free of duty the same as into the United States on and after April 1. But how the loss of about \$3,500,000 to \$4,000,. 000 to the revenue caused by the above change, will be readjusted is the question for the Ministers to decide. Some suggests placing a duty on tea, but it is understood that Sir John Macdonald is averse to taxing that article. On the other hand it is maintained that this objection will be overcome now that the necessity for rescinding the duty on raw sugar has become s Our contemporary asserts that unless

move is made in the direction indicated. immediately after the House meets, "Canada will soon be flooded with the cheap nanufactured product of American re ineries, and the occupation of Canadian manufacturers will be gone, as nothing will be able to stem the tide of snuggling from the United States into Canada, with the inducement of such a premium of \$5 to \$6 per barrel. Why, the smuggling of a single barrel of refined sugar across the border pice of the majority of the people of would be a splendid day's work for one

Consumers of sugar would not regard "flood" of that article, sold at something like the price charged for it in Great Britain, as a grievous affliction. They might view it with some complacency, even if it were brought in means suggested by the Trade Bulletin They have been paying millions of dollars of tribute for the special benefit of the Sugar Combine, and it would not be surprising if they considered it only fair that their turn should come some time.

The Trade Bulletin seems to be afraid that if the tax on raw sugar were thrown off the revenue of the country would suffer, and there would be difficulty in getting some

THE RIGHT KIND OF TALK. Mr. Richard Stutt, the defeated re-

ciprocity candidate in East Lambton, has issued an address to the electors in which he points out that the oil monopoly alone was responsible for his failure to carry the constituency. The farmers rolled up a splendid majority for him. He has great —to let every man make the best possible hindrance-will soon succeed, and that the masses will emancipate themselves. He tells many truths in these sentences:

tells many truths in these sentences:

"An upward movement has begun that Canadians will not let die until combines, monopolies, pools and trusts, barbarous searching by custom officials, and all dead weights to national well-being are swept out of existence. The appeal to the classes has been, 'Vote for your own pockets.' To the party it was, 'You just unfurl the old flag, throw up your caps and shout for the Queen.' Pure buncombe and 'jingo.' Yet I believe thousands of voters were caught by it. We can only make a treaty by consent of the Crown in her Majesty's name. If the issue had been simply a choice between 'high protection' and 'unrestricted reciprocity,' I think an uprising similar to that which condemned the McKinley Act would have cocurred. What had national sentiment to do with giving the over-burdened farmer an untaxed market for the 17,000 horses, 10,000,000 bushels of barley and 37,000 head of cattle we send to the United States every year, as see the Government trade and navigation returns? Because we sell eggs or potatoes to an American must we therefore salute the American flag? Is the country disloyal because half our exports go to the United States? Would we be less loyal if this trade were double? Is a farmer less loyal because he has some money in his pocket? Is Canada to-day following the "old flag" of free trade England and by which she embraces an eighth part of the habitable globe?"

There are few among us who will dare to combat these views or the sentiments contained in this further extract from Mr. "An upward movement has begun that Canadians will not let die until combines,

combat these views or the sentiments contained in this further extract from Mr. Stutt's arraignment of the opponents of

reciprocity:

"Why do the Conservative apologists for the combines run this country down and keep it in thraidom by telling Canadian workers that they are inferior in skill and ability? That this is such a miserable country that it cannot stand in a fair field, while our most enterprising manufacturers are asking for a larger market and starting branch factories outside our protected lines? If protection will give employment, why in every paper those urgent calls upon city councils to provide work for the unemployed?"

The fact is the high tax system, as

The fact is the high tax system, as a means of making the people pros-perous, has proved a miserable failure. A few years ago all praise was being given to the "N. P." Now, where is the disinterest ed Conservative who will laud the "N. P.?" Not one man in 50 can be got to do so. As Principal Grant points out, the Macdonald and Tupper system of taxation is on its last

legs. It cannot survive.
Principal Grant is a candid Conservative.

lives were lost.

A Victim of the Chloroform Habit.

New York, March 24.—James Wall, age
25, was last night found dead in a cheap
lodging house at No. 10 Chatham Square.
Wall was the only son of a wealthy San
Francisco merchant. Some years ago he
contracted the chloroform habit, and was a
confirmed habitue. For some time he had
been an inmate of the Inebriates' Home on
Madison avenue and was thought to be
oured of the habit. On Friday he strayed
off and resumed his old practice with fatal
results.
