New York, Dec. 18—Wall Street, 10:30
a.m.—Rails were lower by fractions to 1½ points at the opening of today's stock market, as a result of the labor organizations' move toward government control of transportation lines. The reaction in rails probably accounted for the heaviness of other leaders, especially General Motors, Crucible Steel and active industrials generally. Oils were erratic, Mexican Petroleum displaying strength, while Texas Company reacted sharply. Pressure against United States Steel contributed to the further irregularity of the list within the first half hour.

2 p.m.—Metal shares were brought forward during the dull noon hour, their advance concurring with reports of further sales of copper and an advance in the price of lead. American Zinc preferrd, American Smelting, and Anaconda, Utah, Inspiration and Cerro de Pasco Coppers were 1 to 3 points higher.

BE SUSPICIOUS OF

Be suspicious of any tenderness or bleeding of the gums. This is usually the first stage of Pyorrhea—an insidious disease of the gums that de-

stroys the teeth and undermines bedily health. Gradually the gums become spongy. They inflame, then shrink, thus capocing the unenameled tooth-base to the ravages of decay. Tiny openings in the gums form gateways for disease germs to enter the system. Medical science has traced many ills to these infecting germs in the gums

weakened by Pyorrhea. They are now known to be a frequent cause of indigestion, anaemia, rheumatism and other serious conditions. So watch carefully for that first tenderness or bleeding of the gums. Try Forhan's immediately. It pori-tively prevents Pyorrhea (Riggs' Dis-

case) if used in time and used consistently.

And in preventing Pyorrhea—it guards against other ills Forhan's (For the Gums) cleans teeth scientifically as well. Brush your teeth with it. It keeps the teeth

white and clean.

If gum-shrinkage has already set in start using Forhan's and consult a dentist immediately for special treatment. 35c and 60c tubes. All Druggists.
