and found cows did well.

# CROWNING OF

Seated on Peacock Throne. Britain's Sovereign will Receive Homage of Ruling Indian Princes

DELHI, Dec. 11 .- The great Durbar tomorrow to celebrate the accession of King George as Emperor of India will far outshine the coronation Durbar in 1903, when King Edward was proclaimed. There will be a public holiday throughout India, and the royal proclamation will be read in every town

and village. Already King George and Queen Mary have taken part in many functions. Delhi is overrun with visitors, and it is expected that the magnifi cent spectacle will be viewed by hundreds of thousands.

In the Durbar of 1993 the Emperor and Empress were represented by the Duke and Duchess of Connaught. About 100 ruling chiefs were in attendance, and the visitors were something less than 200,000. This year the attendance of the King-Emperor and Queen-Empress has attracted vast crowds, while the ruling chiefs have gathered from every quarter of India.

The durbar camp is a vast canvas city, covering about 25 square miles. It is lighted by electricity, served by a perfect water supply and provided with excellent roads and a special railway system.

### Scenes of Splendor

The tent in which both the investiture and the reception will be held, is on Grand avenue. This tent is capable of seating 3.000 persons, and is decorated in blue. Here 160 guests will attend the state banquet tomorrow evening Their Majesty's private tents are to the right, and the vicerov has a somewhat similar encampment to the left. In attendance are hundreds of ruling princes, their camps being in close proximity to that of the king. The historic ridge in the evening presents a truly wonderful sight. As far as the eye can reach twinkle myriads of electric lights, which disclose a picture of white and gold and here and there splashes of color.

King George will arrive tomorroy at the center of the great plain about three miles from his camp for the Durbar in state procession, and will proceed half way around an enormous banked-up arena, in which will be assembled not less than 80,000 spectators. From there he will go to a smaller amphitheatre, accompanied by 20,000

people. After receiving the homage of the chiefs on a dais under a regal purple canopy, their majesties will proceed to a marble dais, surmounted by a golden dome, and will show themselves in their coronation robes and crowns to the assembled multitudes. Twenty thousand troops, with heralds and massed bands, will surround the dais, lending picturesqueness to the scene. The King-Emperor will be seated on

the famous peacock throne On the return to their camps, their Majesties will complete the second half of the circle in the big arena, and then proceed along the princes' road through a number of other camps occupied by the Indian princes

# Further Ceremonial

In the evening the state banquet will be held followed by a reception of volunteer and active officers of the Indian army. On Wednesday there will be a garden party in the fort, and the people's fair below the walls in the afternoon will engage their majesties' attention. A grand fireworks display will take place in the evening. On Thursday there will be a grand review of troops, and in the evening the investiture will take place. Friday will be occupied by a military tournament and point to point races. On Saturday their majesties will go in state to the city, a ceremony which will practically end the Durbar. The state entry, though deprived of the incomparably picturesque elephant procession which aroused so much admiration last time, will nevertheless, include several novel and remarkable features. The military dispositions are far more elaborate. The most dramatic moment will be when the King-Emperor slowly emerges from the grim Delhi gate of the fort and enters the Imperial city. Lord Curzon's state entry was a magnificent defile and nothing more, but this time the ceremony will include numerous special incidents. The separate procession of princes, which afterwards follows the king's route, is expected to be excep-

tionally striking. Everything promises success for the festival. There has been no hitch in the preparations, and fine weather is predicted. This will be the first time in the history of India that the local population has been able personally to vitness the proclamation of their new Emperor-King, Since their arrival their majesties have become extremely popular, owing to the tude they have adopted, and curiosity is centred on the reception of the king's speech, which will announce reforms of great importance.

# Previous Durbars

The first British Durbar-the word Durbar is taken from the Persian "Durbar," meaning court, audience or sitting of a king in state to receive his chiefs in audience—was held in Allahabad in 1859 to celebrate the British government's taking over the rule of India from the East Indian company. The next was held in Lahore by Sir John Lawrence in 1864. This great Indian statesman, just before he left India in 1866, again held a great Durbar at Agra. Then came probably the most magnificent of all Durbars, the one at Delhi in 1877, when Lord Lytton, the governor general, proclaimed Queen Victoria as Empress of India. King Edward was proclaimed at Delhi, be retained.

and today's ceremony is the third held under British auspices in this ancien

by the will of the people through the sidered high enough to place a crown upon the head of the Emperor. Consequently today's ceremony takes the form of receiving homage and the placing of the crown upon his own head and that of the Empress by him-

### LABOR DISPUTES

Member of Belgian Parliament Pro poses Drastic Legislation to Put An End to Industrial Wars

BRUSSELS, Dec. 11 .- M. Masson, Be gian deputy for the coal mining distric of Mons, has drawn up a most novel scheme for preventing the wars of labo and capital by more drastic and certain means than any afforded by arbitration. He proposes the institution o regular industrial and labor law court mposed of nominated representatives of the two interests, assisted by a legal Crown counsellor, and to which employ ers or employed would be compelled to apply for the settlement of their disputes. Whenever either of the parties failed to carry out the sentences of these courts, the latter would sit at criminal courts vested with power to punish the delinquents with fines, sus pension of business or labor, or with confiscation of property.

As the present moribund Belgian parliament will probably lack the necessary time to discuss such a bill it will come peface the next parliament to be elected in June, when M. Masson will inet Minister, with special facilities for getting his scheme passed and experi-

Royal Infant in Spain MADRID, Dec. 11 .- Queen Victoria f Spain gave birth to a daughter this morning. This is the fifth child born to Queen Victoria. King Alfonso and Princess Victoria of Battenberg were married on May 31, 1906. Their first child, Alfonso, was born May 19, 1907.

The other children are Prince Jaime

and Princess Beatrice. One child was

still born.

mprovements Being Made a Coast Stations — Expected that Estevan Will Communicate Across Ocean

Improvements are being made to the wireless stations of the Dominion government on the British Columbia coast with the result that when the new system of synchronous discharge designed some time ago by officials of the radiotelegraph service, which is now being installed at Cape Lazo after being tested at Victoria is placed in other stations it is expected that Estevan will be able to send and receive messages between Vancouver island and Japan under favorable conditions.

Mr. C. P. R. Edwardes, who is in harge of the radiotelegraph service of the Dominion, returned on board the tug William Jolliffe from a trip to the many stations on Sunday, and told of improvements being made. It has been found necessary to increase the power of the coast stations owing to the great amount of interference by stations across the border. Although the United States s a member of the Berlin conference regulating the use of wireless telegraphy the stations across the horder have been found to interfere considerably, and in order to overcome this a system known as the synchronous discharge method, has been designed, and after a trial with success at the Victoria station this system is now being installed at Cape Lazo. The change will greatly increase the power of this station. giving a power of 5 1-2 kilowatts. At Estevan, which station has been most successful in long-distance work, frequent interchange of messages having taken place with Honolulu and with steamers from 1,500 to 2,000 miles distant, two sets designed on the new system are being put in which will give the operators a working distance of 800 miles in daytime, and at night, it is expected that messages will be heard across the Pacific. With the increased power at the Cape Lazo and Estevan stations the wireless officials expect to establish an alternate route for business, the message from Triangle and the northern sttions being transmitted across the island from Estevan to Cape Lazo.

During his trip, in which all the stations were visited, from Pachena to Prince Rupert, Mr. Edwardes made a survey of the land at Alert Bay with a view of acquainting himself with the situation should it be found necessary a any time to erect a station there. He does not consider a station there necessary at the present time, but with the future growth of business it may be necessary to install one there, and another at Chatham point or some other point to connect with Cape Lazo to provide another alternate route.

The business of the coast stations is ncreasing very rapidly. Whereas in 1509-10 the number of messages handled was 18,000 during the following year the total was 72,000, and during the half of this year which ended last month the total had exceeded the total of the previ-

### ous year. New Hockey Cup Offered

OrTAWA, Dec. 11.—Hon. Arthur Stanley, son of Lord Stanley, former governor-general of Canada, and donor of the Stanley cup for the hockey championship, has written to P. D. Ross and William Foran, cup trustees, saying he and Lord Dowdy will give a handsome new cup to replace the old ing up to the surface. The upper par one, Messrs. Ross and Foran are to contains good springs of water which get the opinion from the league teams. The feeling is that the old cup should the presence of water is observable all

Ontario Elections Result in Return of Eighty-three Conservatives, Twenty-two Liberals, One Labor Member

TORONTO, Dec. 11 .- Here is the reshell: Seats in legislature, 106; Liberals elected, 22; Conservatives elected, 83; Laborites elected, 1; Liberal gains, 11; Conservative gains, 6.

The East-Asiatic Steamship Company, of Copenhagen dispatched its steamer Toronto North (A.) McNaught, 3530. Indian from the Danish port on Novem-Poronto North (B.) Hon. J. J. Foy, 510. ber 18th for North Pacific coast ports establishing another line, which is to use the Panama canal to trade between Europe and the ports of California, ford, 3537. Toronto West (B), McPheruget Sound and British Co son, 3224. Victoria East, Mason, accla-Indian, which inaugurates the new service, is a new vessel of 4,700 tons register. The Danish steamers will bring cement, iron and other Scandinavian products and expect to secure large cargoes of South, Schofield, 700. Wellington West, wheat, canned goods, salmon, etc., on Wentworth South, their homeward trips. Until the Panama Regan, 200. York East, McCowan, 550. canal is completed the steamers will come via the Strait of Magelan, and will include calls at South American ports.

Another Japanese steamship line is also in prospect. Capt. U. Nagatsu, of the Mitsu Bussian kaisha, a prominent shipowning and colliery firm of Japan, is now making investigations at Pacific coast ports. After a stay at San Francisco Capt. Nagatsu reached Seattle on Sunday. He has spent eighteen months on a tour of investigation of opportunities for trade for his company, and he anticipates that steamers of the Mitsu Bussan kaisha will be engaged in the ranspacific trade within two years. That Japanese steamers will use the Panama canal and seek the trade of European nations by that route is also probable, according to Capt. Nagatsu. The Nippon Yusen kaisha announced some time ago that it would start a service to New York via the Panama canal.

The establishment of the East-Asiatic Company's service is another indication of the great development that will follow the opening of the Panama canal, and steps are to be made to provide the port of Victoria with proper harbor facilities to secure its share of the great trade. Mr. Louis Coste, the engineer appointed by the Dominion government to make an investigation of the required harbor works protected by breakwaters off the Dallas road foreshore left Ottawa vesterday en route to this city, and will egin his work immediately following

his arrival on Saturday next. An idea of the proportions of the trade that will follow the opening of the Panama canal is given by the figures of the business now being done via the Tehuantapec isthmian railroad across Mexico's narrowest part. The cargo handled by this route is taken from vessels at either end, loaded into cars and discharged into vessels at the other terminal, the handling operations, notwithstanding the fact that they are reduced to the most economical basis, being regarded as still far in excess of even the highest toll that the Panama canal can be reasonably ex

pected to charge. As showing the development that is capable of demonstration between the Atlantic and the Pacific and the interior oints which can be reached with a reasonable local freight rate in competition with the all-rail routes, it can be pointed out that freight originating on the Great Lakes with part water and part rail/carriage to the Atlantic seaboard, is being carried via the Tehuantepec in competi tion with the all-rail carriage.

The Tehuantepec railroad was partly completed in 1906, and in that year the American commerce across both the Tehuantepec and the Panama railroads only amounted to \$6,000,000. The next year, 1907, the Tehuantepec railroad was in full working operation and the total volume of American trade amounted to

The year following this ch succeeding year, in 1909, 1910 and 1911 the increase shown was about \$20, 0,000 a year, the volume of trade 909 being \$62,000,000, for 1910 \$82,000, 00. and for the fiscal year just closed,

with its eastern aspect it should get the sun for a considerable portion of the day; it is well sheltered from all except due east winds and, lying as it does on road and rail, is easily ac-cessible to visitors. It may be consid-ered as typical of the district in which it lies Mr. Edwardes said the service was hort of operators and efforts were being made to secure capable men who would remain at the stations. In order to proride accommodation for married me who entered the service additional couses were to be constructed at the Cape Lazo, Point Grey and Prince Rupert stations. Tenders have just been invited for dwellings.

### SUES FOR DAMAGES

Action Brought by Captain Johnson Sidney on Account of Alleged False Imprisonment

VANCOUVER, B.C., Dec. 11.—Capt-ain Johnson, a former skipper and lighthouse keeper of Sidney, Vancouver Island, is plaintiff in the supreme court in an action for damages against Provincial Constable Bgo and ex-Provincial Moore of Sidney.

Captain Johnson is suing for damages for false arrest and imprisonment He states that in January, 1910, he was arrested by the defendants and held in all for examination as to his sanity and that there was no ground for their action further than personal dislike or he part of certain persons who were behind them in their action.

The evidence revealed a rather lively feud in the little town of Sidney, between certain factions there. One of the defendants said that Captain Johnson had challenged him to a duel and had come with an axe and club and threatened to knock his head off.

Captain Johnson, under cross-examin ation, denied many of the statement of the defendants, one of which was that he had very violently addressed Hon. Wm. Templeman, Ralph Smith and Harry Bullen.

ow.

The case will be concluded tomor-

### Elevator Plant at Owen Sound Totall Destroyed by Fire Steamers Are Slightly Damaged

C. P. R. LOSES

OWEN SOUND, Ont., Dec. 11 .- The elevator plant of the C. P. R. was totally destroyed by fire tonight, with one million bushels of grain, both elevators being levelled to the ground. The C. P. R. steamers Keewatin and Athabasca were saved, slightly damaged, and other buildings were more or less badly scorched. The loss will run over a million and a half dollars.
