

TO BE SHOCKED TO DEATH.

MURDERER KEMMLER AWAITING HIS DEATH AT ALBANY PRISON.
Full Description of the Apparatus which Will Do the Fatal Work Some Days During Its Week Beginning April 28—Kemmler a Changed Man—The Story of His Crime.

ALBANY, April 21.—The case of William Kemmler, the Buffalo murderer, has made its fourth year of the state, resulting in the confirmation of the original sentence. There is no hope for his being put to death in Albany Prison by the application of electricity some day in the week beginning April 28. The day will be selected by the warden, Charles E. Durston. Kemmler was a rough, ignorant fellow and brought all his trouble upon himself by the excessive use of whiskey. He was a heavy drinker and was killed by a bullet which he shot at himself as a quart of whiskey in half an hour, and often made wagers with his companions that he could hold more liquor than they—wagers he invariably won.

Tillie Zeigler was a "partially divorced" woman, and most of the testimony agreed that she was a very bad character. She and Kemmler went to Buffalo from Philadelphia. Kemmler had been married before, and it is said, Tillie was constantly harping upon the subject of her former wife. The morning of March 20, probably sprung by something his mistress had said to him, Kemmler literally chopped the woman to pieces with a rusty butcher knife. He then attempted a brutal brutality when arrested, and she remains in Albany Prison, where she is, and I am willing to take the rope for it.

Kemmler was sentenced May 14, was removed to Albany Prison May 22, and was outside his walls once—when he was taken to Buffalo to be sentenced to the electric chair. He had been sentenced to the electric chair by the Court of Appeals, and the law was unconstitutional because it provided for a second appeal. The courts in every case sustained the law.
