

Bean Magic Pump No. 9

The easiest running pump ever made.
The wonder among spray pumps.

The man who operates the Magic Pump is working against **only one-half the pressure indicated on the Guage.**

In all other Pumps he is compelled to work against the full pressure indicated.

The ideal Pump for the orchard which is too large for a hand pump and too small for a power pump.

Bean Magic No. 9

Bean Challenge Power Sprayer

is also the best of all power pumps. Made on same principle as the Magic, driven by $2\frac{1}{2}$ h. p. gasoline engines of best type.

All Bean Pumps are made with porcelain lined cylinders, and are therefore free from corrosion.

No stuffing box or packing, therefore no leaking or friction.

Capacity—The Bean Power Pump will throw 400 gals. per hour, at 200 lbs. pressure.

The Magic hand Pump will also work up to 200 lbs. pressure.

FOR EFFICIENCY AND POWER

Niagara Spray and Bean Pumps

LEAD THE WORLD

and by their thorough and intelligent use the neglected orchards of Canada will quickly respond and surprise the World with a FRUIT UNEXCELLED.

The establishment of a NIAGARA BRAND SPRAY Factory in Ontario, is the **biggest thing that has ever happened to make possible the growing of good fruit in Canada.**

If you are a progressive Fruit Grower and will at least try out our statement honestly, we will show you the BETTER and EASIER WAY.

What NIAGARA BRAND Lime-Sulphur has done for Oregon, Washington, Idaho, British Columbia, and many other sections, it is doing for Ontario, and will continue to do.

We challenge investigation and contradiction and assert that NIAGARA BRAND Lime-Sulphur has given the highest results of any spray (whether commercial or Home made) in the control of **San Jose Scale, Oyster Shell Bark Louse, Leaf Blister Mite, Aphis, Bud Moth, Apple Scab, Peach Leaf Curl, Potato Blight.**

NIAGARA BRAND Arsenate of Lead will control **Codling Moth**, and all biting insects, **Potato bugs**, etc.

Arsenate of Lead is preferable to Paris Green or any other form of poison. It positively will not burn the foliage. Rains will not wash it off. It mixes readily with water, and stays mixed with the least amount of agitation.

Arsenate of Lead can be safely combined with our Lime and Sulphur, thus making a spray of both fungicidal and insecticidal value. Two sprayings in one saves time and money.

Our prices will surprise you and our Spray Book will give you special instructions on **How to Spray** for Results.
