will kindly write us saying the quantity they have on hand and how much per pound they will require for it.

We offer Vol. 1, nicely bound in cloth, Vol, 2 unbound, and Vol. 3, now running, all for \$2.75. Who wants them?

## BEE-KEEPERS' CIRCULARS.

During last season we printed quite a large number of catalogues and price lists for bee-keepers, and we believe that in every instance the work as well as the price gave satisfaction. We have much better facilities now than we had at that time for turning out work, and we shall be happy to quote prices to any who may be requiring circulars. All we want is the privilege of estimating, and we will then leave the matter with the customer. We generally get up a sample circular (in blank form) showing the style and quality of paper which we quote price for, and we always allow the free use of any cuts or illustrations which have ever appeared in either the C.B.J. or our catalogue. Give us an idea of what you want and we will try and send a sample of it with prices.

### A SPECIAL OFFER.

We have a special offer to make to our present subscribers. It is one which we should advise all who want to take advantage of it to take the chance while it is offered. You all know how nice it is to have a nicely printed note head and envelope for your correspondence. It gives you a business standing, which blank paper and envelopes never can. Now, then, to all those who send in their renewals for the JOURNAL for another year we will forward by mail, post paid, 250 note heads and 250 envelopes—good paper and nice large envelopes—for 75c. That is \$1.75 will procure your renewal for another year and the paper and envelopes printed as advertised. If sent for by themselves the latter are worth \$1.00.

# PRICES CURRENT
