

The saw mill of Joseph Graf at Chepstow, Ont., was destroyed by fire Feb. 14. Loss about \$2,000.

Messrs. Rhodes, Curry & Co., Amherst, N. S., have orders from South America for over a million feet of spruce lumber.

The Canadian Engineer informs us that four large 100 horse power motors are being constructed for the Toronto Street Railway Co. We are glad to know that these will not be small 100 horse power motors.

Messrs. Crossman & Laws, Amherst, N.S., will enlarge their foundry and machine shop plant by the erection of a new moulding shop 110x55, a 28x26 iron and storage room, a two storey 75x28 packing shed, etc.

The Dominion Dyewood & Chemical Co., Toronto, inform us that they are meeting with good success with Mucklow's liquid Hematine, for wood dyeing, for which they are agents. This article is fast replacing chip logwood, they tell us, and that it is preferred by many dyers to any other substance now offered.

Mr. Thomas Robertson, of the firm of Robertson Bros., Toronto, the well known manufacturing confectioners, has invented a new machine to be used in his business, and he is now perfecting arrangements for the construction of it in Great Britain. Mr. Robertson is the inventor of the most valuable machinery known now used in the manufacture of lozenges, having supplied machines to confectionery manufacturers in Great Britain and the United States, and the new machine which he is now about to place upon the market will no doubt be received with equal favor.

Wm. J. Matheson & Co., Montreal, importers and manufacturers of dye stuffs, natural and artificial etc., have sent us a circular having reference to Diamine Dyes, in which they say: Our attention has been called to quotations for colors purporting to be our well known Diamine Dyes, at figures said to be considerably below our prices. Investigation has shown that these colors are really not our Diamine Dyes and are not the colors we sell, although the vendors give them our denominations and claim them to be equal to our dyes. Like all imitations they lack some essential feature of the genuine. Our customers can rely on us to give them the lowest prices consistent with reliable goods. If cheaper colors are wanted, we can match these substitutes offered by our competitors, at figures below those which they name. We should be glad to match any samples you send us, and give you quotations on same; or we will dye on your own goods if you will send us a sample, any shade of color you are interested in, and return you the dyed sample with recipe. We would like to emphasize the fact that in sending us such samples and in receiving such recipes from us, you are under no obligation to buy of us anything that you can buy, or think you can buy, cheaper elsewhere.

Messrs. Conroy Bros. Deschenes, Que., will use electric motors for moving lumber and timber about their large saw mills at that place.

The Alaska Feather and Down Co. are applying for incorporation, with a capital stock of \$20,000, with headquarters at Montreal, to manufacture feather and down goods and bedding of all descriptions.

Messrs. Cowan & Co., Galt, Ont., are busy filling some good orders which they have recently received. Some of their recent shipments have been to Waterloo, Stevensville, Wiarton and Winchester, Ont., and to St. Joseph, Que.

Mr. Wm. Morrison, Lambton Mills, Ont., manufacturer of woollen goods, etc., has recently added considerable new machinery to his factory, including eight Crompton looms, a spooler and a new Sargent burpucker. An improvement has been made to his dryer, which will double its capacity.

The Whyte, Allan Co., of Toronto, are applying for incorporation, with a capital stock of \$20,000, to manufacture fringes, crayes, tassels, gimpes, dress and cloak trimmings, braids, woolens and other articles for upholsterers' use. Messrs. George Whyte, T. A. Whyte and A. G. Allan will be the first directors.
