

THE CANADA LANCET.

INDICATIONS

FOR THE USE OF

BLENNOSTASINE.

In all forms of catarrhal hypersecretion Blennostasine is indicated. It is superior to quinine as a remedy for Acute Coryza, Chronic Nasal Catarrh, Influenza, Hay Fever, etc.

Blennostasine, unlike quinine, is a vaso-motor constrictor, and speedily stops excessive mucous secretions. It will almost invariably arrest the sneezing and the mucous discharges of ordinary influenzal colds.

Blennostasine is especially valuable as a substitute for belladonna, atropine and similar drugs in Hay Fever, Acute Influenza, Rhinitis, and in Rhinorrhœa, Laryngorrhœa and Bronchorrhœa. In addition, it is non-toxic.

Blennostasine is supplied in crystalline form, and in 1, 3 and 5 grain Gelatine-coated Pills. Samples and complete literature on request.
