

Kalamazoo Point Number Two

The Kalamazoo Loose Leaf Binder is of Simple Construction.

THE mechanism of the "Kalamazoo" Loose Leaf Binder is so simple that one hesitates to call it "mechanism" at all. It has no exposed metal parts, and two or four flexible rawhide thongs take the place of the rigid metal posts of the binders in general use.

These thongs are secured to a cross bar working on a threaded screw, and by the operation of the key at the end of this screw, the covers are drawn together or opened for the insertion or removal of sheets.

The "KALAMAZOO" Loose Leaf Binder has been made in the United States and in England for many years and is to-day recognized as the best expression of the Loose Leaf idea that has yet been offered.

Write for descriptive booklet "C.M." giving partial list of Canadian users of the "Kalamazoo" Binder.
