LONDON, - - - - - ONT.**THE PATENT
Exhaust Steam Injector**WORKED BY EXHAUST STEAM
ONLY.

The most economical boiler feeder in existence, and at same time the simplest and most durable. Supersedes both pumps and feed-water heaters and, by condensing the exhaust steam, removes the back pressure, and, consequently, increases the power of the engine. Utilizes a power heretofore thrown away. Works automatically at a steam pressure of less than half a pound. The exhaust steam, in passing through the Injector, heats the feed-water to a temperature of 150 degrees F., thus effecting a saving over any other Injector of from 15 to 25 per cent. in fuel.
