due of a happy industry, gradually extending itself throughout our agricultural districts in the south, yielding food and clothing, an appreciation of comfort with means for its gratification, and above all, issuing in an honest independence of mind capable of discerning and daring to choose the truth.—*Northern Whig*.

SARSKAPE.—A curious and interesting discovery has recently been made which will probably throw considerable light on the text of one of the most popular plays of our great dramatist. A contemporary manuscript of Henry IV, has been found in the archives of a family of title the east of England, and it has been most liberally placed in the hands of Mr. Halliwell for the purpose of publication. We understand that this unique relic which contains numerous important variations from the play as we now have it, will be shortly printed by Mr. Halliwell, under the auspices of the Shakespeare Society.

THE GREAT BRITAIN SHIP.—The first experimental trial of the engine in this vessel has been successfully made in Cumberland bay. The trials made 36 revolutions at 1500 per minute, and were perfectly satisfactory.

The Great British will leave the basin at 7 o'clock on the morning of Wednesday, the 11th of December; she will remain in Kingford for a short time, whence she will make a few experimental trials, after which she will proceed to the Thames to astound the Londoners.

THE STATUTE OF WHITTINGTON AT THE ROYAL EXCHANGE.—On Friday last the scaffolding was raised into the niche on the north side of the Royal Exchange. This admirable piece of sculpture is from the chisel of Carew, and attracted during the whole of Saturday the admiration of the crowds who visited the spot. The figure represents the distinguished citizen replying to an address in his robes as Lord Mayor of London, in the reign of Henry V, and is full of dignity and thought. Whittington lived in the reigns of Richard II, Henry IV, and Henry V, and was knighted when sheriff. He was, as is known, a certain comforter, and had a certain popularity, which will give him a certain place in history.

The Right Rev. President then presented the testimonial in Latin to Literis Hammarioribus, and in Disciplinis Mathematicis et Physicis to the following gentlemen:

UNIVERSITY BONUSES.

	In Literis Humanioribus.	In Disciplinis Mathe- matics et Physicis.
Classis Prima.	Weld, Gals.	Boulton, H. J.
Classis Secunda.	Crookshank, Geo.	
Classis Tertia.	1. McDonald, S. S.	O'Hara, Qualets.
Classis Quarta.	2. Boulton, H. J.	Hagerman, J. T.
	O'Hara, Qualets.	

Aegrotant—Helliwell, J. and Stennett, Qualets.

The Rev. the Vice President then rose and addressed the audience concerning the system adopted relative to the distinctions conferred by the University, and pointed out the precedents which the British Universities afforded for the arrangements which had been made regarding them. He trusted that as this Institution resembled in the distinctions which he conferred, those noble seats of learning in the parent state which she had taken for her models, so also she might resemble them in the attainments of those whom she graced with distinctions.

Now, from official documents, lately issued, we find that an extraordinary increase has taken place this year in the import and consumption of wool as will be seen by the following statement, as made up for the years mentioned to the 10th of October:

1842 lbs.	1843 lbs.	1844 lbs.
Imported to Oct. 10, 33,830,663	37,630,762	56,076,676
Re-exported	2,395,195	2,469,673
Balance for home	30,935,367	35,161,689
consumption	54,684,154	

The above shows an increase in the present year of 19,523,065 lbs, over 1843, and of 23,749,753 over 1842.

GUANO.—In the course of the last few days several vessels laden with guano have arrived in the river Thames. The manufacture is meeting with a ready sale. The Spartan, 600 tons burden, from Ichaboe, is now in the Surrey docks unloading.

In the Survey Canal there are two vessels, Wedd, about 400 tons, and the Young Captain, about 100 tons. In the West Indies there are two others, about 1,100 tons, laden with Peruvian guano.

There are two other vessels in the river, making altogether about 3,000 tons of this new description of manure in the market. The price of the African guano is about 6/- per ton, the quality of which is described to be excellent.

When the Spartan left Ichaboe there were about 200 vessels, some of which were of heavy burden, and which were being laden with the utmost possible despatch. The guano is brought over in bags of from 1½ cwt. to 1 cwt., which are sold on board the ship. Several more vessels are expected in a few days from Ichaboe. A few months ago the price varied from 10/- to 12/- to 11/-.

COMMERCIAL.

LIVERPOOL MARKETS, Dec. 20.—At this day's Markets, which was finely attended by either town or country milites, Wheat was a very limited demand; we repeat the quotations of last Tuesday for oil, but Irish now was rather worse sold, 6/- 9d. per 70 lbs. a top price. Flour was difficult to move, and for anything below prime marks 1/- per sack accepted.

Oats were scarce, and, although few were required, holders were enabled to realize 1/- per bushel advance. No change in the value of Oatmeal. We quote Wheat, Canadian free Red, per 70 lbs. 6/- 4d. to 7/-; White 7/- to 7s. 3d.; United States free Red 6s. 9d. to 7s.; Peas, Canadian per quarter, 35s. to 36s. 6d.; Indian Corn, per 480 lbs. 30s. to 32s.; Flour, Canadian, per 196 lbs. 25s. to 27s.; United States, 27s. to 28s.; Sow. 24s. to 25s.; Clover Seed, American, 40s. to 50s.; Linsated, United States, per hhd. 60s. to 70s. for sowing. The duty on foreign Wheat is 20s. per quarter, and on flour 12s. 10d.

PROVISIONS, (American).—There has been no feature of interest in the Beef market during the past month; the sales have been to a fair extent, without anything of a speculative character. Last Tuesday oil, but Irish now was rather worse sold, 6/- 9d. per 70 lbs. a top price. Flour was difficult to move, and for anything below prime marks 1/- per sack accepted.

Oats were scarce, and, although few were required, holders were enabled to realize 1/- per bushel advance. No change in the value of Oatmeal. We quote Wheat, Canadian free Red, per 70 lbs. 6/- 4d. to 7/-; White 7/- to 7s. 3d.; United States free Red 6s. 9d. to 7s.; Peas, Canadian per quarter, 35s. to 36s. 6d.; Indian Corn, per 480 lbs. 30s. to 32s.; Flour, Canadian, per 196 lbs. 25s. to 27s.; United States, 27s. to 28s.; Sow. 24s. to 25s.; Clover Seed, American, 40s. to 50s.; Linsated, United States, per hhd. 60s. to 70s. for sowing. The duty on foreign Wheat is 20s. per quarter, and on flour 12s. 10d.

Impavidos ferunt ruina.

The Vice President then proceeded to distribute the Prizes and Certificates in Classical Literature and Mathematics, accompanying the distribution with appropriate remarks, calculated to encourage the industry of the Students, and to stimulate increased exertions. Dr. McCall was delighted to present the distinguished Candidates to their respective departments. We subjoin a list of the successful Candidates, to which must be added the names of the authors of the Prize Compositions—Stennett (Latin Poem and English Elegy)—Wedd (Greek Prose), and Crookshank (Greek Tragedy Lambics).

PRIZES AND CERTIFICATES.

Aegrotant—Helliwell, J. and Stennett, W.

There was one feature in the scene which most forcibly impressed itself upon us, as doubtless it did upon many others who were witness to the grand and magnificient proof, which was singularly presented of the falsehood of the assertions which have been made relative to the exclusive character of the Institution. There was scarcely any portion of the Hall or any part of the proceeding which did not supply a refutation of this repeated calumny.

Of the professors on the Dais one was a Roman Catholic—and one a minister of the Church of Scotland—within the bar one of the highest officers of the Institution [the Visitors] was a member of the same Church—amongst the Students were members of different persuasions—and amongst the audience the same diversity prevailed even so far that we might almost say that each denomination in the City was represented by its pastor. Of the Candidates for degrees four had graduated in the Scottish Universities—one was a member of the Church of Rome,—of the Students matriculated, one, we understood, was a member of the Church of Scotland, and two Congregationalists. Of the Students on the side of the institution [the Visitors] was one a member of the Church of Rome and a Congregationalist; and if further proof be necessary of the complete absence of exclusiveness, undoubtedly that proof is to be found in the remarkable fact, that of those who obtained honourable distinction in the Evidence of Christianity from the Church of England Professors of Divinity, were a Roman Catholic and a Congregationalist.

In this portion of the proceedings of the day, the members of the old universities, who were present, must have taken a most lively interest; and we were much gratified by hearing the judgment that the talent and attainment manifested in the Greek and Latin Exercises, were of a very high order. Every one who heard them, must have been struck by the graceful propriety with which they were read. Of the merits of the English Essays, we may ourselves speak. It was a masterly performance, exhibiting great research—skilful arrangement and perspicuous style.

The ceremony commenced with the admission of Candidates for degrees, the first was the Principal of Upper Canada College, F. W. Barron, Esq., who was presented by the V. President, subsequently the following gentlemen were presented and admitted in due form to their degrees:—

M.D. [ad eundem]—John King, Edinburgh; Geo. Herrick, Edinburgh; Henry Boys, Aberdeen; Joseph Hamilton, Edinburgh; A.B. [ad eundem]—Wm. Ramsay, Dublin.

When this part of the proceedings was concluded, the Registrar, Dr. B. called the roll of the Students who were to be Matriculated. The following gentlemen presented themselves and signed the declaration:—

John, John Craigie, William; Crickmore, Charles G.; Dixon, Alexander; Marsh, Thomas; William; McMichael; David; Wickson, Arthur; Wilkes, Charles R.; Loscombe, Charles R.

Immediately after this, the Prize compositions were recited in the following order:—

1. Latin Poem, by Walter Stennett, Sen. Soph. Subject—

2. Anthology exercitus ornatus oritur.

3. Translation into Greek Tragedy Lambics, by George Crookshank, Sen. Soph. Subject—Shakespeare, Trolls, and Croesus, Act. iii, Scene 3, from "Time hath" to "present object."

4. Translation into Greek Prose, after the model of Thucydides, by Wm. Weld, Sen. Soph. Subj. Subject—Gallic Oratio, Tacit, Agricola, xxx. et seq.

5. English Essay, by Walter Stennett, Sen. Soph. Subject—

"The commercial intercourse of the principal nations of antiquity."

In this portion of the proceedings of the day, the members of the old universities, who were present, must have taken a most lively interest; and we were much gratified by hearing the judgment that the talent and attainment manifested in the Greek and Latin Exercises, were of a very high order. Every one who heard them, must have been struck by the graceful propriety with which they were read. Of the merits of the English Essays, we may ourselves speak. It was a masterly performance, exhibiting great research—skilful arrangement and perspicuous style.

The ceremonies were terminated by the distribution of the Honours, Prizes, and Certificates. Previously to entering on the discharge of this duty, the President addressed to the audience a few brief but judicious observations. His Lordship commenced by expressing the high degree of satisfaction which he felt in taking part in proceedings, second in importance and interest to none but those of the opening day. He congratulated the audience on the prosperity which had attended the institution, even amidst all the pressure which had been brought to bear upon it. This his Lordship illustrated by reference to the much slower progress of, we believe, Columbia College, New York, under far more favourable circumstances. The Universi-

ty, he rejoiced to say, had succeeded beyond the expectations of its most sanguine friends—the fruits which it had produced in the short space of one year and a half, were convincing evidence of that success and he had no doubt that it would continue to prosper, as at present conducted, if it were not allowed to proceed without external interference and molestation. At the conclusion of his remarks, his Lordship communicated the intelligence [which was received with a rapturous applause, which it so well merit] that his Grace the Duke of Wellington had been pleased to place him at the disposal of the University for the establishment of a Scholarship, in Cobourg, for the sum of £100 per annum, and his address to the Hon. J. T. Williams, Esq., M.P.P., Port Hope; D. Smart, Esq., Port Hope; C. Hughes, Esq., Port Hope; E. Hill, Esq., Port Hope; Wm. Sisson, Esq., Port Hope; J. D. Smith, Esq., Port Hope; G. S. Dainty, Esq., Cobourg; E. Clarke, Esq., Bond Head.

Parsonage House, Dec. 20, 1844.

SECRETARY'S OFFICE.

Montreal, 21st December, 1844.
