Poisonous action of exudates and transudates, 156
Polarimetry, 69, 126, 151
Polymerisation in fluids, 107
Polynucleosis, 223, 224
Polypeptids, 13
Potassium salts in fluids, 146, 172
Potential ions, 122
Practical value of autolysis, 82
Precipitins, 78
Preformation of proteid constituents, 44
Preliminary separation of chemical constituents, 20, 21
Pressure of contents of ovarian cysts, 176
Procedure for determining C_H, 131
Prolin, 5
Propionic anhydride, 187
Protagon, 44
Protalbumose, 5, 6, 20
Protamin, 5
Proteid Extractive Ratio, 162, 203
Proteid of carcinoma cells, 3
Proteid quotient, 143, 149, 162, 201
Proteolytic ferment, 81, 234
Pseudochylous effusions, 161
Pseudoglobulin, 24, 37, 42, 54, 149
Pseudolymphocytes, 222, 224, 225
Pseudomucin, 35, 38, 178
Pseudomyxoma peritonei, 184
Pseudoserumalbumen, 24
Puerperal changes in uterus, 83
Purin N., 83, 199
Purins, 20, 29, 31, 76
Pus, 101, 145
Pyrocatechin, 170
Pyrrhol, 58, 77

Q.

Quinone test for tyrosin, 35

R

Rate of flow of cerebrospinal fluid, 232
Ratio of chlorides to achlorides, 8, 100, 101
Reducing-power of puncture-fluids, 79
Reductonovain, 47
Refractive-coefficients of fluids, 204
Refractometry, 140, 203
Relation of ferments to lecithin, 86
—— freezing-point to specific gravity, 109
Renal cysts, 190
Residual nitrogen, 33, 34, 150, 168, 199
Results afforded by cytodiagnosis, 221
Retroperitoneal cysts, 189
Reversible reactions, 68
Ricin, 72
Rivalta's test, 37, 205
Rosolic acid test for paralbumen, 39
Runeberg's method of estimating albumen, 201

S

Salol-splitting ferment, 165
Salting out proteids, 22
Salt ratios, 143, 146, 236
Sarcolactic acid, 164
Sarcoma cells, 224
Saturated ammonium sulphate, 37
Scheme for differential diagnosis of cells, 233
— of chemical analysis, 8
Scherer's test, 28
Schiff's test, 187
Schlösing's method, 29
Secretion of goblet cells, 39, 40
Separation of globulins, 22
—— glycoproteids, 36
Serin, 5
Serosamucin, 36, 40, 205
Serum albumen, 5
Serum, concentration of hydrogen ions, 133
Sorbose, 32
Sörensen's method, 74, 75
