COBALT --- Green-Meehan Firmer on Renewal of Ore Shipments --- COBALT

GREEN-MEEHAN FIRMER SO ARE OTHER STOCKS

Ore Shipments Last Week a Favorable Factor on Prices in Mining Markets.

World Office, Tuesday Evening, May 7. influence of ore shipments prices was shown conclusively to-day by the strength of Green-Meehan shares, because of the second shipment from that The local mining markets were du" and there was no weakness to-day, but the smallness of the outside demand but the smallness of the outside demand left the dealings again largely in the hands of the floor traders. The shipments from the camp last week were up to anticipations, and the return to shipments by the Green-Mechan mine caused a small new demand for the stock, which brought a four-point advance in the price. The announcements of additions to the directorate of Foster had no influence on this issue, which, however, held steady on moderate selling.

Nipissing weakened on the New York market, but no longer acted as a factor on the other active issues. Silver Queen was in better demand to-day and all offerings were taken without much change.

ON BOSTON CURB TO-DAY

Stock is Moving Up in Market-English Syndicate Negotiating for Property.

One of the notable features of the Copalt stock market in the last few days has been the upward tendency of Cleveland Cobalt stock. The day before yesterday it was at 91 and yesterday at 98. Some speculation has been aroused as to the cause of this rise.

The World interviewed a prop stockholder of the company last night, and hanced value of the stock was probably

he intimated that the reason for the enhanced value of the stock was probably the fact that negotiations were on foot to sell the property to an English syndicate.

He produced the following letter from Parson, Snyder & Co. of Cleveland in confirmation of this:

"Certain shareholders of this company having expressed apprehension, in view of the possibility of the sale of a controlling interest in the capital stock thereof to a syndicate of English capitalists, for which negotiations are pending, we beg to assure them that should the sale in question be effected it will be on a basis and at figures much higher than those now obtaining, and that every shareholder who may desire to realize will be afforded an opportunity to do so. The proposition made is for the purchase of control, in order to procure which the purchasers will be obligated to take over at the same price all additional stock that may be offered. In this connection, we would assure the shareholders of the company that they shall be kept fully advised regarding the progress of the negotiations referred to, as we are determined that they shall share alike in any and all benefits that may accrue therefrom."

The stockholder, who did not wish his name to be known at the present time, said that the stock would go on call on the Boston curb to-day. Already large orders were in at around \$1 per share, and he predicted that in a few weeks it would reach \$1.25. Toronto shareholders refuse to sell the stock under \$1.25, and many are holding out for \$1.50.

Considerable work is going on in the property. They have got a power plant which will produce 4000 horse-power per

Ing out for \$1.50.

Considerable work is going on in the property. They have got a power plant which will produce 4000 horse-power per day, at an expenditure of six tons of hard coal. Only 100 horse-power of this is needed by the Cleveland Cobalt, and a sumplus is being derived out of this for service in the district.

For weeks Cleveland and Detroit people have been buying Cleveland stock, and this has had a tendency to steady its price.

gold in the Larker Lake region, and after carefully prospecting, selected, staked and recorded what are universally acknowledged seven of the very best claims in this region. All of this work was done before the first fall of snow so that in purchasing this property we know that we have the best-that could be procured in the Larder Lake region. The claims all have a number of large quartz veins, showing values in

Gold, Silver and Copper. Assays ranging from \$8.40 in silver, and \$122.00 to \$1,868.00 in gold have been recorded. It is acknowledged on all hands that our property is the heaviest miner alized in the country.

A gang of men have been at work since the 15th of February putting up the necessary buildings and taking in supplies, machinery, etc., and actual development will commence shortly. To intending purchasers we would advise this as a good investment and

rould be pleased to receive a call from any who desire further information. We are offering \$200,000 of the Treasury Stock at par value, \$1 per share. For Prospectus and full information write the company.

The Larder Lake gold district presents wonderful opportunities for rich profits-also losses.

Everyone should thoroughly investigate and get properly posted before getting in. It seldem pays to take "a flyer"-that's usually only another name for a "blind chance." My office, my engineers and my experienced employes are en the ground. By their aid, and my own personal work, I keep my
