

COBALT--Gifford Flotation is Much Favored by Cobalt Investors--COBALT

Demand Continues Apace Genuine Enthusiasm Grows

Market Displays a Latent Strength That Promises Well for the Future--Cobalt in Public Eye Again.

World Office.
Thursday Evening, Oct. 22.
A steady and unhesitating demand for Cobalt stocks continues apace, and the operations of each day would seem to be a record breaker.

The enthusiasm displayed is of the calibre that stands the test of far-seeing observations and shows no sign of petering out on investigation results.

On the contrary, after all has been said and done, the stocks rise on the results and the aftermath is a deluge of business in New York, Montreal and at the seat of operations--the local exchanges.

The general tone of the market has never been better, and it would seem that there still remains a lot of latent strength that can be depended upon.

Among many transactions to-day, Temiskaming shone out brilliantly and rose to 115 from 105 on Wednesday.

This rise upwards was on the strength of a report, telling of a newly discovered vein that carries exceptional values. It is a two-foot vein.

It is also reported that the company have purchased the Gans lot, immediately to the south, on which a valuable discovery has been made.

It is believed this purchase will add materially to the ore reserves of the Temiskaming.

Peterson Lake and Chambers-Perland were active to-day and exceedingly strong.

Novo Scotia sagged a point or so, and Silver Bar was again called for and sold at 20 cents.

Crown Reserve will be listed in Montreal to-morrow (Friday).

A great deal of the buying in Chambers-Perland came from Cobalt to-day, and the bids at the close were at about the day's highest prices.

Other stocks were strong as usual. The Gifford flotation is being well received, over 95,000 shares being called for from outside points to-day.

LATEST REPORTS.

Find on Temiskaming and Cutting of Cobalt Central Vein.

Wallace and Eastwood received the following over their private wires after the closing of yesterday's curb from P. J. Finlan of Cobalt:

"Big find reported on Temiskaming to-day--a two foot vein. Cobalt Central is the cutting of a big vein, said to be very rich. It was cut with diamond drill."

New York Curb.
R. R. Bongard (Charles H. & Co.) reports the following transactions in Cobalt stocks on the New York curb:

Nipissing closed 10 1/2, high 11 1/2, low 10 1/4. Buffalo, 30 to 31 1/2, high 31 1/2, low 29 3/4. Crown Reserve, 10 1/2 to 11 1/2, high 11 1/2, low 10 1/4.
