BAGGING HIGH GRADE

TO MAKE SHIPMENT

Which directly any the proper management in past years, such as it is now receiving under Engineer Shaw the production records of Colast would show Hargraves in a foremost position? Not aquestion of doubt about this, as during the past three months a large tonnage of rich ore has been brought into sight.

145 Bags of High-Grade on Hand.
That a rich shipment is now being prepared by Hargraves is clearly shown by the rapid baggins of exceptionally rich ore coming from the winze being put down from the 375-foot level in the No. 1 shaft, and in the upraise being sent up above the 375-foot level in the No. 1 shaft, and in the upraise being sent up above the 375-foot level. Over the long-distance phone last night, Manager Shaw stated he had 145 bags of ore awaiting shipment. As this runs between 2500 and 15,000 ounces to the ton, it can well be classed as exceptionally rich ore.

**RefNISH COAST 10 Why is the action would be contested by the government. Judge Mayer filed a memorandum in which he said that the question has never again bombarded last night by German aeroplanes. There were no casualties, it is announced officially. The statement follows:

BOSTON CREEK MINE MAKING PROGRESS

With the arrival of warmer weather operations will be speeded up at the property of the Boston Creek Mining Company, Limited, in the Boston Creek eamp, and it is expected that this condern will come rapidly to the front during the coming spring. Satisfactory progress has been made in the preparation of a carload of high-grade milling ore, which will be shipped out very shortly, and following this it is planned to make a shipment a week, as a result of which it is figured that the company will be able to show substantial profits.

The Boston Creek district came to the front last year, and the indications are that it will be considerably in the limelight as time goes on. The ore carries remarkably high values, and in the case of the Boston Creek Mining Company itself, the indications are that the property is a big mine in the making. The company has a very substantial backing, and has what is considered one of the best mining equipments in the north country. Once shipments are started, it is expected that a remarkably satisfactory record of production will be maintained.
