ST. PATRICK'S HOCKEY TEAM

In the N. H. L. for the season of 1922. From left to right: Stan Jackson, Rod Smylie, Bill Stuart, Ken Randall, Glen Smith, John Roach, Corbett Dennyson, Babe Dye, Harry Cameron, Reg. Noll, Mike Mitchell, Paddy Nolan and Ted Stackhouse.

FORSMAN TO FORE
IN SKATING RACES

Entrant in Local Meet Wins
Two Victories on New York
Ice and Draws Near Metro-
politan Title—Pickering and
Becker Also Figure.

(New York Times.)
Two metropolitan championship events were completed at Becker's Tremont Skating Rink yesterday afternoon, and Paul Forsman of the home rink appears as a result to be well on his way toward adding the metropolitan title to his recently won eastern championship. In the 440 and 880-yard races the blond Tremont skater captured first honors each time and finished the afternoon with a clear lead of twenty points over his nearest rival. Forsman's total was sixty points, with George Pickering of Dyckman Oval trailing him at forty. West Becker of Tremont and Jimmie Smith of the 181st Street Ice Palace followed with ten points each, and the rest of the field was tied with nothing at all.

The weather was exceptionally favorable and the ice was in rare condition when Starter Tom Lynch called the men out for the 440. Becker, Forsman, Pickering, Houseworth and Mike McLaughlin were the five who survived the trial heats. The field started even, but as soon as the first turn was rounded Forsman was three yards in front. He was content to hold his place to the final straightaway, where he sprinted away from George Pickering and West Becker, who fought nip and tuck for the place, Pickering winning by the proverbial eyelash.

Becker Qualifies Despite Fall.
There were three heats in the 880-yard championship, with an "extra" in the form of a time trial for Charlie Schmidt of the Peerless Skating Club, who failed to hear the call for his heat. He started a lonely 880 in 1:26 and was thereby declared eligible to join the select elite in the final. West Becker fell soon after the start of the heat, but he qualified, Pickering took the second heat, and Forsman the third.

It was getting cold and dark when the final started. Forsman adopted his usual tactics of hopping right out in front of the crowd at the first turn, followed by C. Goldberg, a clubmate from the Tremont rink. The rest of the field stayed bunched a few yards behind the leaders. For two laps Forsman led, followed in order by Goldberg and George Pickering. At the half-way mark Goldberg began to tire, and Pickering took up the thankless task of chasing the eastern champion. Jimmie Smith crept up and passed Goldberg, and in the final lap the order of march was Forsman, Pickering, Smith, Becker and Goldberg. This was the way they finished, too, with Forsman holding his lead handily and winning in the good time of 1:21.

Forsman in Great Fettle.
Through his victory in the eastern skating championship at Dyckman Oval and his total of sixty points for the first half of the metropolitan programme, Paul Forsman has jumped along the centre of the skating spotlight. With Joe Moore, international champion, Leslie Boyd, former metropolitan champion, and Al Bach, junior national champion, all out of town, and not competing in these events, Forsman's task has been made a great deal easier, but the Tremont skater has developed the lead of late and his victories are convincing.

LOOK PRETTY AND WARM.
Dartmouth Students Give Some Advice to Girl Guests.
Hanover, N. H., Jan. 18.—Dartmouth undergraduates like their girls to look good to the eye, but they are also solicitous for their comfort and health. Accordingly, in extending invitations to the college's winter carnival, Feb. 9 to 11, the Dartmouth Outing Club added a plea to the young women to provide themselves with woolen mittens and socks, high overshoes or boots and warm tan O's.

FULL SPEED AHEAD!

Winter sport in the Alps. Enjoying a ride down the snow clad slopes of Chateau D'Oze, Switzerland.

MUNICIPAL PLANTS
HAD GOOD SURPLUS

But Price of Sherbrooke Gas
Will Still be High at \$1.50
per 1,000.

Sherbrooke, Jan. 18.—The operation of the gas and electrical departments owned by the City of Sherbrooke shows a substantial surplus of 1921. The net profits for the electric department run close to \$80,000, while the net profits of the gas department slightly exceed \$9,000. Fixed charges and operation costs showed a considerable increase over previous years, due to interest and sinking fund payments becoming due on the bonds issued for the completion of the Weddon development, on which no corresponding earning power has as yet been realized. The output of the plant insofar as K. W. H. generated and actually sold is compared with 1920 of about ten per cent, and this is attributed largely to adverse trade conditions and a corresponding falling off in the use of power. Several of the largest users of power have been running their plants on considerably restricted hours, while in some instances plants were closed down entirely for several months. The earning capacity of the electrical undertaking has been increased by 82 per cent, due to the Weddon development, on an increased capital expenditure amounting to \$768,223, or 46.5 per cent. This plant was placed in operation July 12, and has been running continuously since.

A MILLION DRUG ADDICTS.
That Many in U. S. Investigating Committee Reports.

(New York Times.)
There are 1,000,000 addicts to the drug habit in the United States, according to the estimate prepared by a committee appointed by the Secretary of the Treasury to investigate the use of drugs, and the committee's report also gives the figures on the amount of drugs supplied to the public under the Harrison Narcotics Law. The actual cost to the consumer, while it greatly exceeds this amount, cannot be estimated at the present time.

When we take into consideration that the various investigators have stated that only from 10 to 25 per cent. of the quantities of drugs imported is actually needed to supply the demands of legitimate medical purposes, we can arrive at some idea of the quantities of these drugs consumed by addicts and the amount of money expended to satisfy the addiction.

DRUGGED IN STREET,
\$12,000 GEMS GONE

Dealer is Dragged Into Alley,
Where He is Found Un-
conscious by a Friend—Po-
lice Suppress Crime.

(New York Times.)
Marris Perlmutter of 161 East 118th street, a diamond dealer, lay semi-speechless in his home yesterday, barely able to furnish details—much the worse for the East 126th street station suppressed—of a daring hold-up in which \$12,000 in uncut diamonds, the fumes of a heavy soporific drug lingered in his lungs and he coughed intermittently as he contemplated a loss described by his son as "very heavy to a poor man."

Perlmutter was completing his day's rounds of the jewelry market on Thursday at 8:30 o'clock. He left the Lexington avenue subway at 116th street, walked north in the avenue to 117th street, headed in the direction of Third avenue to make his last call of the day at Goldblum's, on the north-east corner of 117th and Third avenue.

NEAR "PERPETUAL MOTION."
Inventor Says Machine Will Run for Five Years Without Fuel.
Middleton, N. Y., Jan. 18.—Nathan N. Storm, a carpenter of this city, employed by the New York, Ontario & Western Railroad, says he has perfected a machine which closely approaches perpetual motion, and is now having a working model made. He expects to obtain a patent soon.

SAYS 17,500,000
QUIT DRINKING IN
UNITED STATES

Commissioner Haynes Tells
What Prohibition Accom-
plished in Two Years—De-
crease in Arrests.

Washington, Jan. 18.—Two years of prohibition have caused 17,500,000 former consumers to abandon drinking and the entire drink bill of the nation has decreased \$2,000,000,000 a year, according to Prohibition Commissioner Haynes, who has issued a long compilation of "Facts, figures and statements" with which he marks the second anniversary of enforcement.

Only fifteen per cent. of former drinkers are drinking now and these are drinking but five per cent. of the quantity of liquor that was formerly consumed," he said. Prohibition cost the government an estimated total of \$6,274,623.47, he announced. Assessments fines, involving 40,000 cases, amount to \$27,500,000. Of these assessments approximately \$3,000,000 has been collected.

Mr. Haynes lists the entire seizures at \$50,000 gallons of distilled spirits and wine, while the estimated value of property seized during the year, and including one aeroplane, five motorcycles, \$7,500 in cash, ten trunks of land and seven stocks of merchandise.

Herbert Wilbur, of this city, a member of the crew of the schooner Fieldwood, is at his home suffering from injuries sustained while at work on the vessel. While the vessel was in the Passamaquoddy, the foremast dropped suddenly to the deck. Wilbur was assisting to lower the sail and was caught in the coils of rope, which drew him up to a height of thirty feet. Before he could grasp the mast the line relaxed and he dropped to the deck. He lay in a state of coma for forty hours. The vessel put into Lubec and left Wilbur, who was brought to his home here by his wife and brother.

The young lady in the photograph is making a speedy rush down the ice. She does not appear to be any novice at the game either.

Liquor withdrawals reduced fifty per cent.

Another result: Official chemists report only two per cent. of all liquor seized and examined today is fit to drink. Upward of 300 brewers indicted and some have gone to jail. Others on the way.

Manufacturers of whiskey from diverted alcohol have been prosecuted. Evidence has been gathered covering two sources of supply, counterfeit stamps and methods of vending the liquor. Violators, high and low, are feeling the effect of the law.

In fifty-nine cities, with a population of 80,000 or over, and a combined population of 20,000,000 (including New York, Chicago and Philadelphia), official estimated figures show a decrease in arrests for drunkenness from 216,842 in 1917 to 109,768, notwithstanding bad booze, temporary individual hard drinking, and a zeal to "dig" all intoxicated persons.

From various sources it is estimated there were 20,000,000 drinkers in the United States before the country went dry. Of this number there are 1,600,000 who drink occasionally now and another million of old drinkers who imbibe whenever they can get it.

The year 1921 was the healthiest in the United States, according to figures submitted by thirty-seven leading insurance companies.

The figures for the first ten months indicate a lowering of the death rate among policyholders from 5.8 in 1920 to 5.24 in 1921.

NEWSY LALONDE.

High priced Canadian athlete who resigned from the Canadian Hockey Team after Leo Dandurand, manager of the team repudiated him. Manager Dandurand is taking the matter up with President Calder of the National Hockey League. Lalonde may be suspended indefinitely.

W. C. T. U. ON AMENDMENTS.

The W. C. T. U. at a meeting yesterday, endorsed the action of the Ministerial Associations which had gone on record as objecting to any provincial alteration or amendment of the prohibition law which is to go in force in New Brunswick today in accordance with the provincial vote on the matter.

David Hipwell, the president, was in the chair and led the opening devotions. Mrs. Hope Thompson gave a report of her work as visitor at the hospitals, especially among lumbermen and raftsmen. She told also of a visit to the East St. John Hospital. The gramophone records in that hospital, she said, were a great source of enjoyment for the patients.

A further vote of money was made to enable Mrs. Thompson to continue her work. An invitation was extended to the members to attend a meeting when a woman's building for the city will be discussed.

LIKENS PORTO RICO
TO CANADA IN 1839

Commission Asks Congress
for Same Justice Britain
Showed Dominion.

Washington, Jan. 18.—Citing what was declared "the really astonishing similarity" between the political situation in Canada in 1839 and that of Porto Rico in 1922, a commission of Porto Ricans has presented to congress, through Resident Commissioner Lavia, a petition for an ample autonomous form of government, and asking the United States to be "as generous to Porto Rico as Britain was to Canada then and is to Ireland now."

Conceding that at this time it is not possible, the petition declares that only an autonomous form of government, "reasonably granted" to Porto Rico will solve the present political situation and create contentment, and bring about a closer tie between the islanders and the United States.

It cites as a model the settlement of the Canadian crisis seventy-five years ago by Lord Durham, which will "help to demonstrate to congress, although they know it beforehand, that in all problems there exists no wiser or more practical solution than equality and justice."

CHAMBERLAIN'S
The Best Cough Medicine

"I have used Chamberlain's Cough Remedy ever since I have been keeping house," says L. C. Harnes of Marbury, Alta. "I consider it one of the best remedies I have ever used. My children have all taken it and it works like a charm. For colds and whooping cough it is excellent." Keep Chamberlain's Cough Remedy by you—it is a friend in need.
