Accounts

A copy of the Bill of Supply will be sent to the Superintendent year by year as soon as the Estimates are passed and on the receipt thereof ^{he} will open ^{an} accounts with each item of the appropriation so far as the Manitoba Superintendency is concerned - placing at the credit of each such account the amount appropriated and debiting the same with the amount of each invoice of goods purchased and in making purchases he will be careful never to exceed the amount of the appropriation without having first obtained authority from the Superintendent General.

All accounts for supplies such as provisions, agricultural implements &c the Superintendent will continue to send to the Department for examination approval and payment as heretofore and he will be careful to see that they are forwarded week by week so that persons from whom supplies are obtained may have no cause to complain that the accounts are not promptly settled.
